Form of Gift or Bequest

I give to the Board of Administrators of the Charity Hospital of Louisiana at New Orleans the sum of

FIVE HUNDRED DOLLARS

to be added to the Children's Bed Endowment Fund.

.....
Full Name

.....
Date

.....
Address

Resolution unanimously adopted by the Board of Administrators at meeting of June 22nd, 1942:

WHEREAS, The care and comfort of the little afflicted children oftentimes requires some form of amusement, entertainment or special services, not otherwise provided for,

THEREFORE, BE IT RESOLVED, That a fund be established whereby gifts or bequests to this fund to be designated as the *Children's Bed Endowment Fund* be accepted upon the following conditions, to-wit: That the principal be set aside unimpaired in perpetuity, and same be invested in high grade securities, and the income therefrom be dedicated and used exclusively for the care and comfort of the afflicted children receiving treatment in this hospital. Furthermore, a suitable tablet be placed in the Children's Ward, with the name of the donor and date of gift inscribed thereon.

Bed "ENDOWMENT FUND"

JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

July 1, 1947

HIS EXCELLENCY, JAMES H. DAVIS,

Governor of the State of Louisiana

Ex-Officio President

Board of Administrators

Charity Hospital of Louisiana

New Orleans, Louisiana

HONORABLE ROBERT L. PETTIT, Director

Department of Institutions

Baton Rouge, Louisiana

Gentlemen:

The Vice President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the Hospital covering the period from July 1, 1946 to June 30, 1947, inclusive.

The following individuals continued their services as Members of the Board of Administrators during the past year:

**Board of
Administrators**

Mr. Louis G. Riecke, Vice President

Mr. Charles A. Farwell

Mr. C. P. Fenner, Jr.

Dr. A. N. Houston

Mr. William J. Kross

Mr. M. L. Monroe

Dr. N. J. Tessitore

Mr. Fred S. Weis

Mr. Fred W. Matthews was re-elected Secretary-Treasurer of the Hospital.

The Board of Administrators, at its annual meeting, re-elected Mr. Louis G. Riecke as Vice President of the Board. Mr. Riecke announced the appointment of the following standing committees:

Finance Committee:

Mr. Fred S. Weis, Chairman

Mr. William J. Kross

Mr. Malcolm L. Monroe

Medical Committee:

Mr. Charles A. Farwell, Chairman

Dr. N. J. Tessitore

Mr. Fred S. Weis

Mr. William J. Kross

House Committee:

Mr. William J. Kross, Chairman

Mr. C. P. Fenner, Jr.

Dr. Arthur N. Houston

Drs. J. A. Magne and J. N. Dills served throughout the year as Assistant Clinical Directors of the Hospital.

**Administrative
Changes**

Dr. Dills submitted his resignation to become effective June 30, 1947, and the Board of Administrators approved the appointment of Dr. Edgar P. Breaux as Assistant Clinical Director.

Dr. Magne agreed to remain for an additional year.

Dr. O. P. Daly continued to serve as Director of the Hospital.

**Hospital
Buildings**

Main Building—This building contains a total of 2646 beds devoted to patients' care—divided as follows:

Medicine
Surgery
Pediatrics (Premature Infant Station)
Gynecology
Orthopedics
Urology
Neurology
Eye, Ear, Nose and Throat
Dermatology
Obstetrics
Nurseries
Radium Therapy
Dental Surgery
Unassigned Beds

The other departments are as follows:

Operating Rooms (including two surgical amphitheatres) 44
Delivery Rooms (including cesarean section rooms) 10
Pathology Department
Morgue (with amphitheater devoted to autopsies, et cetera)
Central Service Department
Drug Department
Anesthesia Department
Diagnostic and Therapeutic X-ray Departments
Cardiology Department
Medical Record Library
Auditorium
Social Service Department
Admitting and Discharge Units
Accident Rooms
Admitting Rooms

Out-Patient Department—operating the following clinics:

Medical
Surgical
Orthopedics
Obstetrics and Gynecology
Post-Partum
Obs. Special Therapy
Gyn. Special
Sterility
Pediatrics
Infant Feeding and Immunization
Eye, Ear, Nose and Throat
Refractions
Urology
Scraping
Dental (Including dental surgery)
Allergy
Dermatology
Neurology
Pasteur Clinic
Metabolic
Vascular
Plastic Surgery
Tumor Clinic
Special Therapy
Cardiac
Spinals
Endocrine

Non-sectarian Chapel
Dietary Department (with dining rooms for doctors, nurses,
and employees)
Visitors' Food Service for White and Colored
Bakery Shop
Linen and Sewing Rooms
Various Store Rooms
Electroencephalographic Department
Post Office
Hospital Library

Business Offices and Administrative Offices, covering every phase of the administration of the hospital.

The 13th, 14th, 15th, 16th, 17th and 18th floors of the building are the living quarters of the intern and resident physicians attached to the hospital. The 19th floor is devoted to recreation rooms for doctors assigned to the institution.

Because of the large increase in the student-nurse body, the 6th and 11th floors of the Main Building are set aside as dormitories for use by the student nurses assigned to this hospital and affiliating nurses. These floors were vacant because of the hospital's inability to obtain sufficient graduate nurses to staff these quarters and because of lack of sufficient funds to operate them.

This building has functioned satisfactorily throughout the year.

The Hospital authorities are keenly aware of the necessity of placing additional beds in service for patients' use; however, with the funds available, this is impossible.

The Main Building of the Hospital, as well as all other buildings and departments of the Hospital, has been kept in an excellent state of repair throughout the year.

Richard Milliken Building—This building, which was erected by Mrs. Deborah Allen Milliken and donated to the hospital for the care of children, is the only building on the hospital grounds which is not in full use.

Hospital authorities contemplated the possibility of renovating this building for use as a crippled children's hospital and for the care of poliomyelitis cases; however, these plans are being held in abeyance at the present time partly because of lack of funds and partly because of negotiations under way with the Board of Supervisors of Louisiana State University who desires use of the ground now occupied by this building to erect an addition to the L.S.U. Medical Center.

The Hospital Printing Shop is set up in the basement of the Milliken Building. By means of this shop, it is possible for the hospital to print the forms used throughout the institution, accomplishing by this means a great saving to the hospital.

Lapeyre-Miltnerberger Building—This building, which was donated to the hospital for the care of convalescent patients, is being used for that purpose.

This building contains 104 beds devoted to the care of patients who are convalescing from acute illnesses; in addition, there are 16 beds assigned to the Tulane Medical School for a special metabolic study.

The upper two floors of the building have been set aside for use as living quarters for graduate nurses assigned to the hospital. The lower floor of the building houses the Physical Therapy Department and is completely equipped for the care of patients who are in need of physical therapy. The basement of this building contains store rooms and an occupational therapy room for use by con-

valescent patients. The work done by these patients assists in their recovery and, at the same time, helps to provide them with a means of earning a livelihood when period of convalescence is over.

Delgado Building—This building, which was donated to the hospital for the care of surgical diseases, is under lease to the Louisiana State Board of Health as a Venereal Disease Control Hospital. During the past year, 1908 cases were treated for primary and secondary syphilis.

Old Female Medical Building—Two and one-half stories of this building are occupied by poliomyelitis cases. The two upper floors are for the care of bed patients, and one-half of the lower floor is devoted to a physical therapy department and recreation rooms for convalescent polio cases. The other half of the lower floor is set up as a Dietetic Laboratory for use by student dietitians in the Charity Hospital School of Dietetics.

Colored Tuberculosis Building—The lower floor of this building is occupied by the X-ray department for colored tuberculosis, by the lung station devoted to the study of chest conditions, and occupied by the out-patient department and pneumotherapy department. The upper floors of this building are set aside for the care of colored tuberculosis cases.

This building is always crowded and there is always a waiting list.

Dibert Memorial Building—This entire building was donated to the hospital by Mrs. Eve Christine Dibert for the care of acute, surgical tuberculosis cases, broadly interpreted as meaning the care of cases of tuberculosis which are susceptible to treatment, and the entire building is devoted to the care of these patients.

Every effort is made to keep all beds devoted to tuberculosis in an active condition. Chronic, untreatable cases occupying beds should not be cared for in facilities such as Charity Hospital has, because the beds in use are limited and the need for beds for the care and treatment of cases which can be cured is so great that it is wrong to deprive these individuals of a chance to get well.

Hospital authorities realize the great need for facilities for the care of the chronic, untreatable cases of tuberculosis. This is one of the most serious problems facing our State at the present time.

Isolation Building—This building is devoted exclusively to the care of infectious and contagious diseases, and is the only unit of its kind in this vicinity.

Student Nurses Home—This building is dedicated exclusively to the student nurses in the Charity Hospital School of Nursing.

Because of the great growth of this School, the building is no longer large enough to house the entire student body, which now numbers approximately 700; therefore, two floors in the Main Building have been requisitioned for use as dormitory space for student nurses who are learning their profession in this institution. Unquestionably, the hospital will be forced in the near future to face the necessity of obtaining additional room for student nurses.

We must make every effort to maintain and train as many student nurses as possible, because during the present shortage of graduate nurses, it would be absolutely impossible to maintain the services in this institution without the assistance and services rendered by these student nurses.

Graduate Nurses Home and Old Ambulance House—These two buildings, situated on Tulane Avenue across the street from

the Main Building of the Hospital, have served throughout the year as living quarters for graduate nurses who are on duty in this hospital.

The graduate-nurse problem has been and is one of the most serious problems facing this institution. We have been able to maintain only a skeleton crew, and the fact that our graduate nurses can reside on the premises is one of the main factors which permits us to maintain enough nurses to carry on the functions of this hospital.

Sisters' Home—This building, which is on the corner of Claiborne Avenue and Gravier Street, is occupied exclusively by the Sisters of Charity, who have been connected with this hospital since 1834, and contains their living quarters and chapel.

Hospital Laundry—All of the hospital's laundry work is done in this laundry, which is in use constantly throughout the year.

A great deal of the mechanical equipment in this laundry is badly worn, and replacements will be necessary in the immediate future.

Hospital Garage—The lower floor of this building is set up as a garage and ambulance house with quarters for ambulance drivers who are on duty.

Half of the upper floor is used as living quarters for female doctors who are on the staff of this institution. The remaining half of the upper floor is occupied by the automotive work shop and is used for repairing and maintaining the automotive equipment owned by this institution.

Warehouse—Attention is called to the necessity of expanding the hospital warehouse, which is far too small for the demands made upon it. Postwar building plans contemplate remedying this situation.

Main Powerhouse—This building which contains the power plant, ice plant, air-conditioning system, and other machinery necessary for the operation of the hospital has rendered excellent service throughout the year.

McWilliams Boiler Cleaners were installed throughout the building during the past year and are rendering excellent service.

Maintenance Building—This old building, which is situated in the rear of the power plant, is a fire hazard and is in bad state of repair. It should be torn down and replaced by a modern building, and this is contemplated in the postwar development plans.

Automotive Equipment—The automotive equipment purchased just before the beginning of the past fiscal year is rendering excellent service.

During the past year, the following unit was purchased:

- (1) Electric Automatic Truck (for warehouse)

Other automotive equipment within the hospital is old and badly worn, and will have to be replaced.

Department of Medical and Surgical Care—The care of the patients assigned to this institution is made the direct responsibility of the Visiting Physicians on the Staff of this hospital. There are four (4) units active in this institution: Tulane Unit, composed of visiting physicians who are affiliated with the School of Medicine of Tulane University, and 40% of the patients admitted to the hospital are entrusted to their care; the L.S.U. Unit, composed

Patients'
Services

and staffed by physicians affiliated with the School of Medicine of Louisiana State University, and 40% of the patients are assigned to their care; the Independent Unit, staffed by physicians who are not affiliated with either Medical School, and 20% of the patients who are admitted to the hospital are entrusted to their care. In addition, there is a Dental Unit, and all dental patients are assigned to the care of this unit. This division of patient responsibility is carried out throughout the institution and its patients are assigned to these units in the above proportions.

Rotating interns are not assigned to any unit for the entire year of their service. Intern service in this hospital is on a rotating basis, and interns are rotated from one service to the other without any particular regard for unit classification.

Resident physicians (the term applied to that group of doctors who are studying the various specialties of medicine and surgery) are, however, definitely assigned to the various units; for instance, a doctor is assigned entirely to Tulane Surgery—L.S.U. Medicine—Independent Obstetrics and Gynecology, et cetera throughout the entire list of specialties. The entire service of a resident physician is spent on the unit for which he applied and to which he was assigned.

The training of intern and resident physicians is the direct responsibility of the Visiting Staff of the hospital and this training is carried out in such manner as to obtain approval of the various accrediting agencies and boards. Charity Hospital residents who complete their training in the various specialties are all eligible for approval by the various specialty boards.

The Director of the hospital and his Assistants are charged with the overall supervision of patients' care, and it is their responsibility to see that all patients admitted to this institution are adequately and properly cared for. The Director of the hospital and his Assistants are also charged with the control of the interns and resident physicians and it is their responsibility to supervise the training program for these young doctors; likewise, it is their responsibility to discipline members of the resident and intern staff, to formulate and issue rules governing their conduct in this institution and the care of patients within the clinics, accident rooms and wards of the hospital.

During the past year, there was a total of 753,268 adult patient-days and 30,727 newborn patient days. During the same period of time, there were 365,580 patients seen in the out-patient departments or clinics of the hospital. During the past year, 17,416 operations were performed in this institution and 8,448 babies were delivered; 164,235 patients were seen and examined in the Admitting Rooms; and the Accident Rooms handled 76,258 cases.

The average cost per patient day was \$5.39. The average cost for patient-visit in the clinics was \$.83.

The overall mortality, excluding patients who died within thirty-six hours after admission, was 3.09%.

The figures given above give some idea of the scope of work done by this institution. It should be borne in mind that the patients treated in the Charity Hospital in New Orleans come from every parish in the State of Louisiana. We mention a few: Ascension Parish, 598; East Baton Rouge Parish, 2,039; East Feliciana, 305; St. Landry, 620; Washington, 606; and so on and so on throughout the entire roster of parishes of the State of Louisiana.

The Charity Hospital acknowledges a debt of gratitude to the members of the Visiting Staff of Physicians of this hospital whose services are freely given without cost to the patients or to the State. The leading physicians and the most prominent teachers in medical profession give unstintingly of their time and skill in the care of Charity Hospital's patients. They are subject to call at any time of the day and night, and, without exception, these calls are cheerfully and promptly answered. This is an unselfish service on the part of these doctors and, because of this service, our patients obtain the highest degree of medical and surgical care. In addition, these physicians and surgeons train our young interns and residents, and because of this training, the people of Louisiana and the South will be vastly benefited because these young doctors will, of course, be the physicians who will care for future generations.

During the past year, there has been no dearth of physicians. The war is over and the young doctors, having been released from the service, are anxious to complete their medical education. The hospital has been most anxious to assist them and everything has been done which could be done to give training to as many of our returning veterans as it was possible for the hospital to do. Preference has been shown to veterans in making appointments in this institution, and, at the close of this year, our intern and resident staffs are composed mainly of doctors who are veterans of the recent war.

Attention is called to the list of scientific articles written by members of our resident and visiting staffs. (See PUBLICATIONS OF CHARITY HOSPITAL STAFF, July 1, 1946—June 30, 1947, following Report of Vice President and Director.) This, again, gives some idea of the scope of scientific work which is done in this institution.

Psychiatric Unit—This unit of 87 beds, located on the third and fourth floors of the Main Buildings, has rendered excellent service throughout the year.

The Unit is devoted to acute mental cases only, and these cases are not permitted to remain longer than six weeks. Many of these cases are able to return to their homes upon completion of treatment; others have to be referred to mental hospitals. This unit is not set up and organized for long-term care of mental or neurotic patients. Authorities in this hospital do not believe that a long-term mental hospital should exist within this institution; however, we realize that the size of this unit is not sufficient to care for the calls made upon it, and, at some future time, plans must be made to expand this unit and to improve its facilities.

Premature Infants Unit—During the past year, the hospital has been, and continues to be, very much interested in the development of adequate facilities for the care of premature infants. The mortality rate in this group of patients is always high. A few years ago, we faced the terrific mortality rate of approximately 70%. By devoting special care to these infants and by making available facilities for their proper care, such as incubators, sterile technique, correct dietary procedures, et cetera, the hospital has been able to reduce this mortality rate to approximately 30%; and we hope to reduce it still further.

During the past year, negotiations were entered into with the Children's Bureau through its affiliation with the Louisiana State Board of Health, and arrangements were completed for the

Departmental
Units

entire reorganization of this department and the organization of a most modern and up-to-date premature infants unit, which will be used not only for the care of premature infants, but as a teaching center for doctors, nurses, public health nurses, et cetera.

The cost of operating this unit will be met by a Federal grant.

The plans call for setting up within this hospital a completely renovated and modernized department for the care of these infants, air-conditioned throughout with separate facilities for the individual care of each infant.

X-Ray Department—This department is divided into two sections, the Diagnostic Division, under the supervision of Dr. Leon Menville, and the Therapeutic Division, including applications of radium, under the supervision of Dr. Manuel Garcia.

The X-Ray Department offers diagnostic services throughout the entire institution, including units in the Accident Rooms, Clinics, Tuberculosis Buildings, and the Infectious and Contagious Unit, as well as the main diagnostic division, which is located in the Main Building of the Hospital. During the past year, 73,584 patients were examined; and 120,021 films were processed.

In the Therapeutic Division 18,120 cases were treated and in the Radium Division 474 patients were treated. The hospital purchased radium and applicators in the amount of \$3,955.00 for the Therapeutic Department and also purchased for the Therapeutic Department a General Electric Therapeutic X-Ray Unit (250KV).

The X-Ray Department conducts a School for X-Ray Technicians. During the past year, 14 new students were admitted and 10 completed their training. This is an approved school.

Pathology Department—This department, under the supervision of Dr. Emma Moss, is one of the most important departments in this institution.

This department has been badly handicapped because of difficulty in obtaining sufficient personnel.

Some idea of the scope of work done in this department can be realized by the fact that approximately 415,000 laboratory tests were made during the past year and, in addition, over 10,000 surgical specimens were received, sectioned, and examined. During that same time, there were 1,050 autopsies held.

The Pasteur Institute, which is under the supervision of the Pathology Department, received 1,551 patients.

The Pathology Department in this institution conducts a School of Medical Technology for the teaching of medical laboratory technicians. During the past year, 15 students were admitted and 13 completed their training in this school. This is an approved school.

Out-Patient Clinics—The Out-Patient Departments or Clinics are divided into clinics for the reception of White patients and clinics for Colored patients.

One entire side of these clinics had remained closed since 1942, when the hospital had serious financial reverses. On March 3, 1947, we reopened the entire White clinic wing, thus enabling the hospital to maintain clinics for White and Colored patients every day of the week.

During the past year, there were 365,580 patient-visits in the White and Colored clinics of this hospital.

This department and the Admitting Rooms of the hospital were united and placed under the supervision of Sister Ignatia in so far as patients, employees, and nurses are concerned.

The physicians practicing in the clinics and the Admitting Room physicians were placed under the direct supervision of Dr. Magne, Assistant Clinical Director.

In order to obtain a stabilized Admitting Room staff, arrangements were made by which physicians who serve satisfactorily for one year in the Admitting Department are given an appointment to a residency position in this hospital upon completion of their services. By this means, we obtain the services of a group of acceptable physicians for a period of one year.

Adoption of rules and regulations governing this department has assisted greatly in maintaining the flow of patients through the admitting rooms and the clinics of the hospital and has materially assisted the hospital and the patients who seek care in this institution in obtaining rapid and efficient attention.

It must be remembered that from 1,500 to 2,500 patients are seen in the clinics every day and from 500 to 1,000 are seen in the admitting rooms every day.

Operating Rooms—Since 1942, this hospital had functioned with only one-half of the operating suite in use. On March 3, 1947, the admitting suite known as the Delgado Operating Rooms was opened for patients' use. These additional rooms have helped greatly in servicing our patients.

During the past year, 17,416 major operations were performed in this hospital.

Dietary Department—The Dietary Department, under the supervision of Sister Euphemia, has served efficiently throughout the year. There were 3,786,252 meals served by this department; 45,031 infant formulas were prepared and served; and 222,435 special diets were prepared and served during the past year.

The School of Dietetics, conducted in the hospital, is under the supervision of the Dietary Department. This is an approved school and during the past year 13 students were accepted and 13 graduated.

The Dietary Department also operates a Nutrition Clinic for instruction of patients in the Out-Patient Department, and during the past year, 21,929 patients were contacted and instructed in the proper diets which they should follow.

The Dietary Department has worked very closely with hospital authorities and with the Children's Bureau in working out the plans for the development of the Premature Infants Unit; one of the requirements of which is a complete formula room. This unit will go into operation during the next fiscal year.

Research Department—Hospital authorities have, for years, been aware of the vast amount of clinical material available in this institution and of the fact that insufficient use of this material from a scientific standpoint has taken place.

With this idea in view, the Board of Administrators discussed with individuals interested in scientific advancement the possibility of setting up in this hospital or in connection with this hospital a research department; the expense of operating this department

to be divorced entirely from the appropriation made to the hospital by the State Legislature.

As a step towards the development of this department, the Board of Administrators, from funds entrusted to their care, ordered an electron microscope at a cost of more than \$20,000, and authorized preparation of quarters for setting up this piece of ultra scientific equipment. Definite plans for the development of this project have not been completed but every effort will be made in the near future to develop this research project.

Nurses—The nursing problem continues to be the most serious individual problem facing the operation not only of this hospital but of all other hospitals.

Charity Hospital has endeavored to meet this situation by making available living quarters for use by the graduate nurses assigned to the hospital; by paying salaries to the extent of our ability to nurses employed by the hospital; and by enlarging the Charity Hospital School of Nursing. This has required an extensive recruitment program, included in which is the distribution of letters, pamphlets, et cetera to all of the approved high schools in practically all of the Southern states; by taking advantage of the cooperation of the radio stations throughout the South, and by the public press; both of which have been most cooperative in assisting us in obtaining recruits for the student nurse training program. By means of this intensive work, we have been able to maintain an acceptable number of under-graduate student nurses, without whose assistance, it would have been impossible to operate this hospital.

During the past year, 488 nurses were accepted as students; 105 were accepted from other schools as affiliating students; 83 nurses were accepted for special training; and 172 nurses were graduated. In addition to the above, the hospital has organized and is now operating a School for the training of Nurses' Aides, and we hope to develop a group of young women who, while being limited in the work which they are permitted to do in this hospital, will greatly assist the student and graduate nurses in the care of our patients.

Anesthesia—Gas Therapy—Blood Bank—These departments are under the efficient supervision of Dr. John Adriani.

The Department of Anesthesia is responsible for all anesthetics given in the hospital, and, under its efficient administration, anesthetic deaths and accidents have been greatly reduced.

This department is responsible for training doctors in the specialty of Anesthesia and is also responsible for training nurses as nurse-anesthetists. The graduates of these two departments are fully qualified for their respective board requirements.

The Gas Therapy Department is charged with the responsibility of administering Oxygen and other therapeutic agencies.

The Blood Bank, which was developed in this institution three years ago, is operated on the principle of a bank. Various services are given credit for the donors sent to the bank from their service and they are charged with transfusions of blood used by their department. By this means, the bank is enabled at all times to have a sufficient supply of blood available for all emergencies. Donors are obtained among the friends and relatives of our patients and public spirited citizens who volunteer to donate blood for our charity patients.

Acknowledgments

The Hospital desires to acknowledge the very valuable services rendered this institution by the Volunteer Workers. The supervision of these Volunteer Workers has been entrusted to Miss Polly Amis, who has done excellent work.

We wish to express our appreciation to the American Red Cross and to its Chairman, Mrs. Charles F. Buck, Jr. The local chapter of the Red Cross has continued to make surgical dressings for this hospital. Without their assistance, it would have been most difficult, indeed, for the hospital to obtain dressings necessary for the care of our patients.

The Charity Hospital Guild, under the supervision of Miss Nellie Boudreaux, has, during the past year as during many years previously, continued to play a most important part in supplying surgical dressings for our patients in this institution. This group of volunteer workers, for the past thirteen years, has loyally and faithfully given of their services to the poor of our State. Too much credit cannot be given to them.

Sisters of Charity—For over 100 years, the Sisters of Charity of St. Vincent de Paul have served the poor of our State and community. Working with these Sisters has been a pleasure. We deeply appreciate their services and we gratefully acknowledge a debt which this institution and the poor of our State owe to these good women, who, so unselfishly, devote their entire lives in the service of the poor.

The Board of Administrators and the Director of the Hospital wish to again express to the Honorable James H. Davis our appreciation for his sympathetic understanding and cooperation.

We wish to express appreciation to the Honorable Robert L. Pettit, Director of the Department of Institutions, and to all who are connected with that Department. The relationships existing between this Hospital and the Department of Institutions continue to be most cordial.

The Vice President and the Director of the Hospital wish to express sincere appreciation to the Members of the Board of Administrators of this Hospital for their cooperation and guidance through the year.

The Committees appointed by the Vice President have functioned throughout the year. The members of these committees have been most conscientious in their work, have zealously attended meetings, and have given the benefit of their counsel and advice to the administrators of this institution.

We express to the members of the Visiting Staff, to the resident physicians, and interns our deepest appreciation for their constant devotion to duty and their willingness, at all times, to answer calls made upon them.

We also wish to compliment the Department Heads within the institution and all personnel for the efficient services rendered by them during the past year.

Respectfully submitted,

LOUIS G. RIECKE,
Vice President
Board of Administrators

O. P. DALY, M. D.,
Director
Charity Hospital of Louisiana

DR. O. P. DALY, M. D., Director

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

August 10, 1947

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, Louisiana

Dear Dr. Daly:

The Accounting Department herewith presents the monthly report on the financial condition of the Charity Hospital of Louisiana at New Orleans for the fiscal year ending June 30, 1947.

The Report is composed of the following Exhibit and Schedules:

Exhibit	I	Balance Sheet
Schedule	I-A	Statement of Income and Expenditures
Schedule	I-B	Surplus and Deficit Account
Schedule	I-C	Visitors Food Service Operations
Schedule	I-E	Statement of Allotment Balances
Schedule	I-F	Hospital Equipment and Furnishings
Schedule	I-G	Hospital Buildings
Schedule	I-H	Capital Outlays
Schedule	I-J	Federal Grants—U. S. Cadet Nurses Fund
Schedule	I-K	Unexpired Insurance Premium
Schedule	II	Statewide Mobile Unit—Blood Plasma Program
Schedule	III	Statement of Miscellaneous Income
Schedule	IV	Summary—Operating Expenses
Schedule	VI-A	Hospital Admissions, Discharges and Patient-Day Costs
Schedule	VI-B	Comparative Statement of Monthly Cost of Operation
Schedule	VI-B-I	Comparative Statement of Departmental Cost of Operation fiscal years 1945-46 and 1946-47
Schedule	VI-C	Admissions by Parishes
Schedule	VI-D	Number of Employees on Payroll

Respectfully submitted,

L. A. MILLET,
Chief Accountant

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS
COMMENTS ON OPERATIONS

Fiscal Year July 1, 1946 to June 30, 1947

At the beginning of the fiscal year, July 1, 1946, a Work Program was prepared and submitted to the State Budget Officer. The following tabulations reflects the original estimate of means of financing as compared with actual funds received.

Means of Financing			
	Estimated 7/1/46	Funds Received	Increase
State Appropriation	\$ 4,271,900.00	\$ 4,271,900.00
State Board of Liquidation.....	45,496.23	\$ 45,496.23
Bond Liquidation Fund.....	279,464.00	280,410.00	946.00
Federal Grants			
V. D. Project.....	50,000.00	56,976.63	6,976.63
Maintenance of G. I. Doctors.....	60,000.00	64,098.53	4,098.53
Tulane Metabolism Project.....	1,771.84	1,771.84
	\$ 4,661,364.00	\$ 4,720,653.23	\$ 59,289.23

Appropriation 537

Cash Disbursements Local Account 7/1/46 to 6/30/47.....	\$ 1,809,675.83	
Add Accounts Payable—Trade, June 30, 1947.....	66,925.77	
		\$ 1,876,601.60
Cash Disbursements—Operating Account 7/1/46 to 6/30/47		2,788,581.31
Total Expenditures—fiscal year 1946-47.....		\$ 4,665,182.91
Expenditures per Schedule "E".....	\$ 4,664,413.91	
Other Miscellaneous Expenditures.....	769.00	
	\$ 4,665,182.91	
Deduct: Expense Refunds (Schedule "E").....	32,858.40	
Total Expenditures less Operating Credits.....		4,632,324.51
Cost of Operations (Schedule IV).....	\$ 4,585,881.90	
Capital Outlay Expenditures.....	45,212.84	
Increase—Inventory, Materials and Supplies.....	32,345.08	
Increase Prepaid Insurance.....	4,535.79	
Other Miscellaneous Expenditures.....	769.00	
	\$ 4,668,744.61	

Deduct:

Cost of Materials and Supplies from previ- ous years' commitments included in fiscal years' cost of operation.....	\$36,796.56	
Less—Cash Discount earned on previous years' audited vouchers paid subsequently to June 30, 1946.....	359.46	36,437.10
		\$ 4,632,307.51

Cost of Operations for the fiscal year compared with the previous year increased \$522,848.85 accounted for as follows:

	Fiscal Year		Increase	Percent Increase
	1945-46	1946-47		
Salaries and Wages.....	\$ 2,546,585.54	\$ 2,810,225.51	\$263,639.97	10.35%
Food	634,782.27	710,592.82	75,810.55	11.94%
Drugs & Surgical Supplies.....	383,248.20	505,083.96	121,835.76	31.79%
Other Operating Expenses.....	394,821.18	445,266.86	50,445.68	12.78%
Repairs & Maint. Supplies.....	103,589.04	114,705.93	11,116.89	10.73%
	<u>\$ 4,063,026.23</u>	<u>\$ 4,585,875.08</u>	<u>\$522,848.85</u>	<u>12.87%</u>

Using June, 1946, Payroll cost as a base: viz., \$216,173.18, it will be noted that there was a constant month to month increase in salaries throughout the fiscal year.

	Salaries	Increase	Percent Increase
July, 1946	\$219,756.52	\$ 3,583.34	1.65%
August, 1946	225,467.93	9,294.75	4.30%
September, 1946	226,382.68	10,209.50	4.72%
October, 1946	229,140.99	12,967.81	6.00%
November, 1946	233,125.51	16,952.33	7.84%
December, 1946	232,025.82	15,852.64	7.33%
January, 1947	235,510.19	19,337.01	8.95%
February, 1947	238,036.17	21,862.99	10.11%
March, 1947	240,724.55	24,551.37	11.36%
April, 1947	242,663.28	26,490.10	12.25%
May, 1947	242,404.81	26,231.63	12.13%
June, 1947	244,987.06	28,813.88	13.33%

Comparative cost of Patients' Care for the biennium were as follows:

	1945-46	1946-47	Increase	
			Number	Percent
In-Patients Days	755,147	783,995	28,848	3.82%
Average Cost per Patient Day.....	\$4.99	\$5.39	\$.40	8.02%
Out-Patients Days	377,271	435,082	57,811	15.32%
Average Cost per Patient Visit.....	\$.79	\$.83	\$.04	5.01%

Patients Accounts Receivable—\$61,868.38

During the fiscal year billings against ineligible patients amounted to \$88,947.93 compared with billings amounting to \$93,597.20 during the previous fiscal year, a decrease of \$4,649.27 or 4.97%.

Total collections during the year amounted to \$47,420.54, compared with \$64,091.61 during the previous fiscal year, a decrease of \$16,671.07, or 26.01%.

Patients Accounts Receivable—July 1, 1946.....	\$110,367.40		
Ineligible patients billed 7/1/46 to 6/30/47.....	88,947.93	\$199,315.33	
Collections 7/1/46 to 6/30/47.....	\$47,420.54	23.79%	
Uncollectible accounts charged off.....	44,979.06	22.57%	
Uncollectible accounts transferred to Patients inactive account	45,047.35	22.60%	137,446.95
Balance active accounts 6/30/47.....		31.04%	<u>\$ 61,868.38</u>

Fees paid to collecting agencies during the year amounted to \$601.77.

Inventory—Material and Supplies—\$172,424.84

Compared with the fiscal year ended June 30, 1946, Inventory of Operating Materials and Supplies increased \$32,345.08, accounted to as follows:

	Fiscal Year Ending		
	6/30/46	6/30/47	Increase
Drugs	\$ 22,500.00	\$ 30,672.23	\$ 8,172.23
Food and Groceries	9,696.30	9,618.72	77.58*
Household Supplies	28,884.37	33,889.35	5,004.98
Office and Multigraph Supplies	7,918.97	9,804.64	1,885.67
Maintenance Materials and Supplies	37,756.52	47,416.76	9,660.24
Surgical Supplies	33,324.60	41,024.14	7,699.54
	<u>\$140,080.76</u>	<u>\$172,425.84</u>	<u>\$ 32,345.08</u>

Hospital Income—Payable to State General Fund

During the year collections of income reverted to the State General Fund amounted to \$122,847.00 compared with \$143,438.31 the previous year, a decrease of \$20,591.31.

Profits from the Visitors' Food Service Department which also reverts to the State General Fund amounted to \$19,616.71 compared with \$20,428.37 the previous fiscal year.

DONATIONS TO THE DIBERT TUBERCULOSIS BUILDING

July 1, 1946 to June 30, 1947

2 Card Tables by patient and relative of patient.

16 New Books to Library by Lions Club.

100 Used Books to Library by Davidson Private Lending Library.

50 Used Books to Library by Rev. Caleb B. K. Weed.

Used Electric Phonograph by American Legion 8/40.

20 New Phonograph Records by American Legion 8/40.

About 25 Used Phonograph Records by Student Nurses.

Phonograph Records by Marilyn Barnett, Lorraine Birsner and Rev. Caleb B. K. Weed.

14 Boxes Candy at Chirstmas by Jacobs Candy Company.

\$18.00 to be used for Handiwork by American Legion 8/40.

Gifts costing about \$4.00 each to 17 poorest Patients by American Legion 8/40.

200 Current popular Magazines—weekly, Teche Greyhound Station—by Traffic Manager Mr. Ivy King.

Annual Christmas Party to 150 men (each male receives \$1 in cash) by Dibert Auxiliary.

About \$200 of Christmas decorations by Canal Street Merchants and others.

Easter basket with home pralines by Faithful Prayer Circle, Evangelical Church.

Weekly flower donations by Rev. Caleb B. K. Weed.

Crochet thread amounting to \$60 by V. F. W. Cruiser New Orleans No. 2783 Auxiliary.

Frequent loan of public address system for entertainment by Morris Music House.

Local night club and radio entertainment—free often as possible, through Mr. John Lester of News and Radio.

75 pot plants by Magnolia Garden Guild.

Monthly Bingo Party by St. Margaret's Daughters—for Women only—Santa Marie Circle.

\$20 four times per year for holiday parties—Annual Easter and Chirstmas Party by St. Margaret's Daughters—Santa Marie Circle.

DONATIONS TO CHILDREN'S WARDS—NINTH FLOOR

W900

- Dec. 15, 1946 Play and refreshments by Senior Class of Dominican High School.
- Dec. 18, 1946 Toys and refreshments by Ladies Auxiliary, Cruisers of New Orleans Veterans of Foreign Wars.
- Dec. 19, 1946 Movie, toys and refreshments by Grey Ladies. Mrs. Chas. F. Buck, Jr., Chairman Volunteer Services, American Red Cross, New Orleans Chapter.
- Dec. 20, 1946 Movie, toys and refreshments by Metairie Women's Club, Mrs. J. D. Mateu, Chairman.
- Dec. 21, 1946 Puppet show, toys, 25¢, refreshments—B. P. O. E. Lodge No. 30, Miss Rosenthal, Secretary.
- Dec. 22, 1946 Toys and refreshments—Algiers Heroes—Coast No. 5187—Ladies Auxiliary Veterans of Foreign Wars, Miss Emily Whittenburg, Chairman.
- Dec. 23, 1946 The Women's Traffic and Transportation Club sent beautiful toys and candy to be given to children on Christmas Day; Marietta F. Meunier and Eleanor Strong.
- Dec. 23, 1946 Bell Telephone Employees sent a collection of some \$18.00 to give children a party during holidays.
- Dec. 24, 1946 Various Church Groups of Grace Methodist Church from Metairie left scrap books and gave out story books and candy to children.

W908 AND W910

- Dec. 25, 1946 Anonymous—Large basket of assorted fruit, candy, etc.
Anonymous—\$10 to be used for some poor patient. This donor lost her only son in the recent war but did not want her identity known.
Dr. J. A. Magne—\$10 to be given to make some poor patient happy. Was given to child in W904 who was most deserving.
- Jan. 1, 1947 Happiness Helpers Organization gave Victrola - Radio combination to W900 School Room, also 2 albums of Victrola Records.
Happiness Helpers—Mrs. A. L. Judis made presentation of two collapsible wheelchairs. Given in memory of Shirley Weil Greengus. (W900 Schoolroom.)

C900

- Dec. 21, 1946 Sunshine Helpers gave a movie, toys and refreshments.
- Dec. 22, 1946 Mrs. M. L. Anderson, Chairman, Dillard U. Sorority gave refreshments and toys.
- Dec. 23, 1946 Toys and refreshments—Mrs. C. Goldsmith, Chairman.
- Jan. 6, 1947 Toys and refreshments—Loyola University Students.

W900—EASTER PARTIES

- April 5, 1947 Toys and refreshments—American Legion Junior Auxiliary-Metairie Unit.
- April 7, 1947 Toys and refreshments—Grey Ladies.
- April 8, 1947 Toys and refreshments—Judie Cootiette Club No. 60—Veterans of Foreign Wars Auxiliary.
- April 9, 1947 Toys and candies—Munholland Methodist Church.
- April 10, 1947 Mrs. Bordelon and Ladies gave toys and refreshments. Happiness Helpers gave Victrola Records.

C900

- April 9, 1947 Sunshine Helpers gave Easter Party.
- April 10, 1947 Easter Baskets—The Scout Cubs.

St. Vincent dePaul gave subscriptions to Little Messengers and Treasure Chest, comic magazine for one year.

Mr. Philip McCabe brings toys, candy and shows movies in the Children's Ward frequently throughout the entire year. This is done on W900 and C900.

American Red Cross, through Mrs. Ford, gave: 12 Sets of Chinese Checkers.

Mr. William A. Allen, 820 ½ Clarence Street, Lake Charles, La., sent 48 Jigsaw Puzzles, used but in excellent condition.

Grace Episcopal Church sent candy to Children's Wards several times during the year.

Donations of used toys, clothes, comic books at various times during the year.

The Grey Ladies have given parties to the Children on W900 on the different holidays throughout the year as: Halloween, Thanksgiving Day, Valentine's Day, Washington's Birthday, etc.

DONATIONS TO SOCIAL SERVICE DEPARTMENT

Miss Eleanor Gardiner, Ponchartrain Hotel, New Orleans, \$10.00 for cancer patients.

Mrs. R. G. Robinson, 26 Audubon Place, New Orleans, Invalid supplies.

Mrs. Robert Dick, 2806 St. Thomas Street, New Orleans, Wheel Chair and Crutches.

Anonymous donations of crutches, 5 wheel chairs and 1 radio.

DONATIONS TO THE HOSPITAL IN GENERAL

Mrs. C. C. Blancq—91 dolls.

American Red Cross—499,200 sponges.

Camp Plauche—medical and surgical material in broken lots: medication, bandages, gauze, muslin, plaster.

Charity Hospital Guild—Books and magazines; 800 baby garments; 2 baby layettes to 10th floor at Christmas.

Mr. Harold H. Bergman, 1618 Cambonne Street, New Orleans, donated 2 Beauty Rest Mattresses valued at \$40.00 each.

DONATION TO CONTAGIOUS BUILDING

4 Radios (Crosley)—Unknown donor. April 2, 1947.

DONATION TO BLOOD BANK

Pedestal Fan to Blood Bank by Magnolia Garden Guild as a birthday gift—June 28, 1947.

Donation of 1 Rolling Chair for Eighth Floor, Main Hospital, by Miss Beulah Abadie.

Donations by the various Groups, as follows:

Red Cross Groups
Sunshine Helpers
St. Margaret's Daughters
La Laque (Hard of Hearing)
St. Louis Cathedral
Maison Hospitaliere
St. John Berchman Asylum
New Orleans Women's Club
Grace Episcopal Church
St. Elizabeth's Asylum
Good Shepherd Convent

For cash donations and legacies—see Report of Board of Administrators, Charity Hospital of Louisiana at New Orleans, Trust Funds.

July 22, 1947.

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Dr. Daly:

There exists an extreme shortage of skilled personnel in this Hospital due both to a continued scarcity of available personnel and to the fact that salaries for such persons are set at a lower level than is paid in the municipal area. Unskilled and semi-skilled personnel is available but since the salaries which the Hospital is able to pay are not adequate to meet the continuous rise in living costs the turnover remains high among this group.

In November 1946, the Civil Service Commission met to discuss the situation existing in the State Service with regard to pay rates. Following this conference, the Civil Service Department revised the ranges for nearly every class of position. The minimum and maximum rates of pay were raised one, and in some instances two, steps. The new ranges became effective on January 1, 1947 for all State Agencies with sufficient appropriations to use them. Because of an extreme shortage of funds, this Hospital was unable to use the new minimums. The new maximums are in effect for all positions in the State Service. Our inability to use the new pay ranges has caused discontent among employees and has become a great problem in recruiting for this Hospital since all other State Agencies in this city have adopted the new ranges for most classes of positions.

In March 1947, a chest X-ray survey was made on employees of the Hospital. The results of this survey quickly proved its worth since several cases of suspected tuberculosis and a few cases of active tuberculosis were discovered. These cases were followed up in the Hospital Clinics. This survey will be repeated twice yearly.

During April 1947, it was decided to set up the class of Nursing Aide I at this Hospital as a means of meeting more adequately the need for nursing care to patients. In order to qualify for employment in this class, an individual must have had Red Cross Nurse Aide training, some training in an accredited nursing school, or training in this Hospital in an eight week course similar to that given Red Cross Nurse Aides. The use of the class Nursing Aide has not been in effect long enough to be properly evaluated.

During the fiscal year, the following personnel transactions were made:

2953 employments
1041 discharges
26 lay offs
2 suspensions
153 transfers
209 promotions
2 demotions

These figures show a net increase of approximately 251 persons. This was brought about by the fact that in February 1947, the plan to pay Non-Cadet Student Nurses was put into effect and it became necessary to employ these students at the rate of ten dollars per month and by the necessity for employing people for the reopening of Clinics and Operating Rooms which occurred in March 1947.

We wish to express our sincere appreciation to the Director of this Hospital and to its Department Heads for the generous assistance which has been given the Personnel Department during the past year.

Respectfully submitted,
VIRGINIA B. WALDO,
Personnel Director.

July 1, 1947

Board of Administrators, and
Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, La.

Gentlemen:

The departments conducted by the Sisters have made strenuous efforts during the past year to maintain the high standards of their respective departments despite the fact that we were unable to employ and retain adequate personnel, particularly in the Nursing Service Division.

The Housekeeping Department has had less turnover among its employees resulting in more efficient performance. We feel that the Dietary Department, despite the increased cost of food products, has done an excellent job in serving nutritious and satisfying meals to all, and in training the student dietitians enrolled.

Our greatest concern has been our inability to furnish adequate nursing care to the patients due to our depleted graduate staff. While good nursing care standards require a minimum of 3.2 hours of nursing service per patient during the twenty-four hour period, frequently we have given less than one hour service per patient during that period. Instead of the situation improving with time, it grows worse and has reached a point where we are gravely concerned over the lack of care given patients and over the lack of supervision given our student nurses. It is our responsibility to properly educate student nurses and this cannot be achieved unless they have adequate graduate nurse supervision. Unless the salaries of our graduate nurses are increased and made commensurate with those in our community, we fear that the few loyal, faithful nurses that we now have will leave us.

We regret exceedingly that many of our subsidiary workers are receiving less than a living wage. Despite that fact, they have given freely of their time and effort in an attempt to maintain the standards of the hospital.

We wish to commend our student nurses who have made heroic efforts during the past year to substitute for graduate nurses and for having so generously given so many hours overtime service in our wards.

We wish to thank you for your solicitude and interest in our departments, and to express our gratitude to the Medical Staff, the heads of the various departments and to the personnel of the Hospital for their continued cooperation.

Respectfully submitted,

SISTER ZITA,
Director, Sisters' Divisions

To the Board of Administrators and Doctor O. P. Daly, Director, Charity Hospital of Louisiana at New Orleans.

Gentlemen:

We wish to present the annual report of the Nursing Department for the fiscal year ending June 30, 1947.

NURSING SERVICE DIVISION

It is unfortunately again necessary to reiterate the statements that we have been compelled to make over and over during the past twelve years regarding the inadequacy of the nursing care provided for patients in the hospital. The cessation of the war emergency has done nothing to relieve the tremendous deficiency in our nursing staff. Indeed, the low budget on which our department is forced to operate permits of a salary scale so much lower than that of most local hospitals that it is impossible to build up our drastically reduced staff of graduate nurses. We have experienced no relief during the past year from the overwhelming struggle of the war years.

Because of this situation, our graduate nurses, now numbering 257, are working under constant strain, and far too much reliance is placed on student nurses who now comprise the greater part of the staff. Our students, who are here primarily for educational purposes, are compelled to spend an excessive number of hours in overtime work on the wards, a situation which is not only contrary to a well rounded training program, but also unfair to them as students.

Survey of Ward Situations

In view of the difficulties experienced in carrying on the educational program of the student nurses, it was considered necessary to conduct a thorough survey of ward conditions to determine if it was possible to put into effect on the wards the principles and techniques which are taught to the students in the classrooms. In March, three instructors made twenty-four hour observations for six days and submitted complete reports of actual ward situations. A compilation of these reports revealed many acute problems and at the same time, instances of almost heroic devotion to duty. Summarized, the main problems noted are: patients are receiving a very poor quality of nursing care due to the shortage of nurses, the severe pressure under which all nurses are working, and the too great responsibility given very young students; the lack of supervision and assistance by graduate nurses results in many errors and omissions on the part of students; nurses are performing many tasks which could be done by non-professional workers, if more of these helpers were available.

We have known for years that the size of our nursing staff fell far short of accepted standards. According to the American Hospital Association and the National League of Nursing Education, medical and surgical patients should receive at least 3.2 hours of nursing care in every twenty-four hour period. At Charity they receive approximately one hour of nursing care. Although the same authorities say one head nurse should be responsible for not more than 30 patients, most of our head nurses manage units of about 50 patients. The conditions revealed by the survey are not to be wondered at considering that so few nurses are available for the all important service rendered by the nursing department.

Following the survey a long-term program of follow-up on the problems found was inaugurated. At the present time most of the effort is

being directed toward securing more non-professional personnel such as nurse aides since we cannot attract graduate nurses, and toward educating the supervisory staff in better methods of ward management and teaching of students.

Nurse Aides

Before attempting to alleviate staffing conditions by the introduction of nurse aides, a demonstration unit was established on the White Female Orthopedic Unit for the purpose of testing the effectiveness of the trained nurse aide. Seven of these aides were placed on duty in the unit with four senior cadets and a head nurse. Younger students were removed from the unit. Although the results showed that the unit ran smoothly with this plan of staffing, this advantage was outweighed by the disadvantages of the plan. Nurse aides require constant supervision, and as they are unable to assume complete responsibility for the patient, at least one nurse must be on the unit at all times. This necessitated the assignment of four senior cadets to this unit constantly, and other units on the eighth floor suffered through the deprivation of the services of senior cadets. In addition, the experiment proved financially costly, as the salaries of the nurse aides exceed the cost of operating the unit with student and part-time graduate nurse service, as had formerly been done.

At the conclusion of the experiment a recommendation was made that we abandon the thought of staffing units with nurse aides, and instead, supplement the existing staff on the busiest units with these aides.

Recognizing the valuable assistance which can be rendered by nurse aides when properly trained and used within certain limitations, the Nursing Department has inaugurated a training program for nurse aides. Classes of not more than ten students each will be trained for an eight week period. The course will include classroom lectures, practical demonstrations and practice on the wards. Aides are being taught how to assist the nursing staff in giving needed care to patients, but the program does not constitute a course in practical nursing.

Dibert Tuberculosis Building

The most critical situation with regard to the Nursing Department exists within the Dibert Tuberculosis Building. Because continued resignations from the staff have left only three head nurses for the entire building, and the graduate staff averages not more than six nurses, it has become necessary to delegate too many nursing duties to attendants. Realizing the dangers inherent in such a procedure, permission was asked and granted to employ 14 trained nurse aides for this building. Since the assignment of nurse aides will require changes in the administration of nursing service in the Dibert, we have requested the U. S. Public Health Service to allow Miss Agnes Bowe, Tuberculosis Consultant, to conduct a survey and assist in initiating the new nursing service program in Dibert. The survey is now in progress.

The employment of non-professional persons to perform nursing duties, however, does not completely solve the problem. Student nurses assigned to the building cannot be adequately supervised under present conditions, yet we do not wish to deprive them of this valuable clinical training. In order to continue providing this type of experience for the students, we have recommended the employment of a clinical instructor for the students in the Dibert Building.

Because the present budget of the hospital is inadequate to provide the salary for a clinical instructor, outside agencies were appealed to in the hope that one of them would assist us by supplying funds for her salary. We have not yet been successful in obtaining this assurance.

Opening of New Sections of the Hospital

On March 3, the white side of the clinics and the Delgado Operating Rooms were opened. This, of course, placed an additional load on the Nursing Department, and although it was hoped that this move would relieve congestion of patients, to date, little relief has been noted on surgical wards. The census remains abnormally high and the nurses are constantly confronted with the problem of "over patients."

SCHOOL OF NURSING

Department of Nursing Education	14	6

Recruitment Program

Following an intensive recruitment program for student nurses we were successful in filling our quota for the class admitted in August, 1946, when 143 students were enrolled. The February, 1947, class however, fell below the number expected but, nevertheless, showed an increase over the number admitted in February, 1946. The second class of this year was admitted in June instead of August, and this accounts for the increased enrollment of this fiscal year over last year. We believe that the \$10.00 monthly stipend promised at the completion of the pre-clinical period accounts in great measure for our gain over the previous year.

Accelerated Program Discontinued

The last two classes admitted to the School of Nursing were not placed on the accelerated program maintained during the war years, and up to February. The pre-clinical period has been lengthened to eight months for these classes in order to lighten the students' weekly number of class hours.

ACKNOWLEDGMENTS

Although the total picture of the Nursing Department is unfavorable and reveals an urgent need for amelioration of present conditions, we are deeply appreciative of the efforts to assist us which have been made by the Board of Administrators and Doctor Daly. We wish, also, to express our gratitude to the various department heads and personnel, to our own loyal staff, and to all others who have by their cooperation so greatly aided the Nursing Service Division and the School of Nursing.

Respectfully submitted,

SISTER HENRIETTA, R. N., *Director*
School of Nursing and Nursing Service

Charity Hospital of Louisiana at New Orleans
ANNUAL REPORT FOR THE OUT-PATIENT
DEPARTMENT

For Fiscal Year 1946-1947

Submitted by: **SISTER IGNATIA, R. N., B. S.**
Director, Out-Patient Department

July 18, 1947.

To the Board of Administrators and
Doctor O. P. Daly, Director
Charity Hospital of Louisiana at New Orleans

Gentlemen:

I herewith submit the Annual Report of the Out-Patient Department for the fiscal year beginning July 1, 1946 and ending June 30, 1947.

On March 3, 1947 we re-opened the white clinic wing, this has solved some of our over-crowded problems, but on many days it is still impossible to handle the immense crowds as we would like to. We have a lower daily average since we are operating the entire department, but statistics show an increase in both white and colored patient visits reporting to clinic since July, 1946.

Our equipment is for the most part adequate, except we are very much in need of replacements on our electric fans which were taken for use in various departments of the hospital during the time the white wing was not used for clinic patients. It is a terrific injustice to have the doctors and personnel work the long hours they do in the crowded clinics without fans.

There is need of a new floor in our Colored Tubercular Clinic, the present one has rotted in several places and is dangerous. Plastering in this unit is going on at the present time.

The Department wishes to express gratitude to our Director, Doctor O. P. Daly, and the Assistant Director, Doctor J. A. Magne, to the Board of Administrators, to the Medical Staff, both house and visiting, for their splendid service and cooperation and to the Record Library, Pathology, and X-ray Departments.

I also wish to express sincere appreciation to my own staff for their loyal and generous service.

Respectfully submitted,

SISTER IGNATIA, R. N., B. S.,
Director, Out-Patient Department.

The following statistical tables present a picture of the huge amount of work done in the hospital's Out-Patient Department:

ANNUAL REPORT OF THE DIETARY DEPARTMENT

July 1, 1946—June 30, 1947

To the Board of Administrators and Doctor O. P. Daly, Director Charity Hospital of Louisiana at New Orleans.

Gentlemen:

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1946 and ending June 30, 1947, is herewith respectfully submitted:

ACTIVITIES AND ACCOMPLISHMENTS

The third class for Dietetic Interns was enrolled in Charity Hospital, July 1, 1946. The second inspection of the Course for re-approval was made in February, 1947, by Miss Lucille M. Refshauge, Educational Director of the American Dietetic Association. Re-approval was granted by the Approval Board with just one recommendation—that the Dietetic Interns be given opportunity to gain experience in a commercial food service unit. Accordingly, arrangements have been made with Mr. A. D. Barber, District Manager for Louisiana, of Morrison's Cafeterias, Incorporated, for our Interns to affiliate at both Morrison Cafeteria Units for this experience. They will spend 10 to 14 days observing business methods, food cost control systems, counter supervision and storeroom management.

The Nutrition Clinic contacted 21,929 patients in the Out-Patient Department from July 1, 1946 through June 30, 1947. This was an increase of 7,418 over the preceding fiscal year.

The patient meals served during the year show a slight decrease while personnel meals show a slight increase. Comparative figures follow:

	1945-1946	1946-1947
Personnel Meals	1,461,455	1,461,629
Patient Meals	2,293,444	2,212,920
Delgado Building Meals	104,040	112,605
*TOTAL MEALS	3,858,939	3,786,252
Total Special Diets Served.....	302,040	222,434

*This total includes 45,031 Infant Formulae.

With plans completed for the institution of a Training Program in Premature Infant Care under the guidance of the Children's Bureau, Washington, D. C., it was found that our present Formula Room did not meet the requirements of the Children's Bureau; and, since remodeling was not feasible, space was allocated on the 10th Floor Maternity Division for a complete new unit. Plans were drawn up after consultation with many noted authorities, including representatives of the Children's Bureau,

Washington, and the Bureau of Child Hygiene, New York, and noted pediatricians both here and in other parts of the country. The plans have the approval of Dr. M. L. Wegman, Head of the Pediatrics Department of Louisiana State University; Dr. R. Platou, Head of the Pediatrics Department of Tulane University; and Dr. Paretto, Representative of the Children's Bureau, Washington. The new unit promises to be one of the most outstanding of its kind in the country.

RECOMMENDATIONS

There is an acute need for a wage scale and an adequate budget to provide a living wage and a chance for advancement to all employees, especially those in the lower classifications. We know that hospitals cannot compete with private industry, but we do have the responsibility of paying a fair wage to our employees to assure them a decent standard of living. If we could offer a better salary, we could attract a more stable, efficient class of employee, thereby eliminating the rapid turnover we now experience from the "shiftless" type of worker, who stays only long enough to draw one or two pay checks, then fails to return to work.

A comparison of the personnel assigned to the Dietary Department at Charity Hospital with minimum figures given by Laughran in "Yardstick for Municipal Hospital Personnel" in "Hospitals", 1942, shows a shortage of 8-10 employees in our department. This shortage is particularly felt in the Student Nurses' Cafeteria and the Doctors' Dining Room. We receive many complaints from these groups because they have to wait long periods of time to be served. Four additional workers would ease this situation considerably.

It is a general rule in industry that the lower the remuneration to employees, the more need there is for supervision. There is no doubt that an increase in our staff of dietitians would result in the saving of food and better service. Our dietitians are working very hard, working long hours and find that it is a physical impossibility to do all that is required of them. With the exception of the Dibert building, there is no supervision by a dietitian of the food service in any of the outside buildings. Better supervision is badly needed in the Contagious Unit, the Colored Tubercular building, and the Convalescent Home. Therefore, it is recommended that we increase our staff by at least five, two to act as relief dietitians to our present staff and three to organize the food service in the outside buildings.

We are grateful for some structural changes in our cafeterias that have increased efficiency and service. Space for a dish scraping room was allocated in the Graduate Nurses' Dining Room, and space in the White Employees' Dining Room was taken for a Colored Nurses' Dining Room.

We are hoping that sufficient funds will be available next year to replace the make-shift cafeteria equipment in the Colored Employees' Dining Room and to more completely ventilate all cafeteria space in the Main Building which continues to be unbearably warm in spite of the fans installed last year.

Study should also be given to the fact that a large number of hospitals have converted personnel meal service to pay cafeterias. The hospital employee often resents the menu offered to him as part of his maintenance and would prefer to select the foods he desires. We, too, have long felt that greater satisfaction could be attained with a marked reduction in food waste and complaints, if the responsibility for food selection could

be placed on the individual. It will take much study and planning, but we recommend that our cafeterias for personnel meals be turned into pay cafeterias, and that employees be given salary adjustments to cover the maintenance they are now receiving.

APPRECIATION

We are most grateful to our Director and to the Board of Administrators for their unfailing interest and assistance in our difficulties. We are also grateful to the Sisters, the Medical Staff, the Nursing Department, the Engineering Department, the Maintenance Department, the Purchasing Department, the Personnel Department and all other departments for their cooperation and assistance.

Respectfully submitted,

SISTER EUPHEMIA, *Director*
Dietary Department

HOUSEKEEPING DEPARTMENT

July 22, 1947.

To the Board of Directors and Doctor O. P. Daly, Director of Charity Hospital of Louisiana at New Orleans.

Gentlemen:

The annual report of the Housekeeping Department for the fiscal year beginning July 1, 1946 and ending June 30, 1947 is herewith submitted.

No changes have occurred in the functioning of this division during the past year, and the activities were chiefly centered upon improving supervision and management. A merit system was introduced November, 1946 for the purpose of stimulating the employees' interest, to give recognition for good work, and to improve housekeeping. With this system merits are given for cooperation, personal appearance, good attendance, punctuality, observance of policies and regulations, and good work performance. The progress each one makes in obtaining merits is posted, so that porters and maids have an opportunity of seeing how they stand in relation to their co-workers. At the end of each month an award of time off is given as recognition to those who have secured the desired number of merits. The results have been very gratifying. Not only are they giving better service, but the attendance has greatly improved, so that the number of absent days per month has been decreased more than 50%. It proves to be a valuable tool in the hands of the supervisory group to assist in the management of personnel, and has lightened the burden of supervision.

Seven positions were abolished during the past year, two from the Convalescent Home and five from the Main section due to the closing of the seventh floor. Ten new positions, however, were added in February 1947 when the White Clinics were opened.

Two hundred eighty-three mattresses were renovated during the past year.

In the Salvage Division \$3,440.72 worth of salvage material was sold. This is twice the amount which was handled last year, and continues to be operated by one man.

The work of extermination of pests has been greatly improved. The Orkin Exterminating Company who is responsible for this work appointed a very efficient exterminator to work this hospital. He follows up on his own work and has built up a very pleasant relationship with the personnel in all divisions. Many favorable comments have been received from the various departments about the success of his work.

The window cleaning contract with the National Window Cleaning Company was renewed with the agreement that windows be cleaned every two months instead of every month as had been done in the past. This has been quite satisfactory; the arrangement has saved the hospital \$835.00 per month.

The services of wall washers are badly needed in all sections of the hospital. The difficulty of keeping men in the porter jobs at \$65.00 per month makes it almost impossible to get this work done. Outside of this the cleanliness of the institution has been fairly well maintained.

LINEN AND SEWING SECTION

This section has been able to give better service to the hospital this year than the last few previous years, because linen was more available and a fairly adequate supply was purchased. New sheets to the amount of 9,548 were added to the stock and sufficient material was obtained to make garments which could not be purchased ready-made.

The sewing section is carrying a heavy load of work considering the number of seamstresses compared to the volume of labor. Besides the large amount of new material that is needed to keep this institution supplied with linen, twelve to fourteen laundry baskets full of linen needing mending pass through the sewing room each week.

A linen inventory was taken June 15, 1947 in all the divisions, and plans are to continue taking them at certain intervals to aid in keeping a better check on the linen stock. The inventory showed that there are 23,000 sheets in circulation throughout the hospital. A few additional linen room attendants are also needed to relieve the strain of the work in the Central Linen room.

We wish to express our sincere appreciation to Dr. Daly and to the Board of Directors for the generous assistance which has been given to the Housekeeping Division the past year. We gratefully acknowledge also the interest and cooperation we have received from all department heads.

Respectfully submitted,

SISTER CLARISSE

Director of Housekeeping Department.

MEDICAL SOCIAL SERVICE DEPARTMENT

MISS LOUISE MEYER, Director

July 18, 1947.

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Dr. Daly:

The following is the report of the Social Service Department for the fiscal year, 7/1/46 through 6/30/47.

The function of the department is to provide case work services to patients under treatment in Charity Hospital wards, clinics, accident and admitting departments, to determine eligibility for free medical care, to participate in the teaching program of social work students, medical students, student nurses and dietitians, to participate in community activities designed to alleviate some the lacks of the community which affect the functioning of the hospital, to interpret the function of the hospital to the community, and to participate in research.

Case Work Services

Turnover in staff, lack of staff and the opening of the white clinics all affected the work of the department. Service assignments are designed to give the workers a definite section of the hospital for which they are responsible, and at the same time to facilitate their work by having them handle one medical specialty such as Medicine, Surgery, etc., and, by being responsible for both wards and clinics, to enable them to work with the same doctors and patients throughout the patient's period of treatment on the ward and in the clinic. The opening of the white clinics, with both white and colored clinics being held simultaneously, was a strain since it meant that the workers had to handle both white and colored clinics operating simultaneously. In June, 1942 the last time both sides of the clinic had been open, Social Service had had four additional social workers and eight additional clerical workers, all lost during the reduction of hospital personnel in the summer of 1942. Trying to carry on the same coverage with four vacancies in the social work staff besides the twelve positions abolished was difficult. One way of meeting the problem would necessitate the service assignment being divided into all colored or all white or the discontinuing the division by LSU and Tulane, neither of which was desirable for under either plan continuity of relationships between patients and workers and doctor and worker would be lost and there would be less opportunity for the development of case work skills. In an attempt to make it possible to continue to assign services in relation to the medical service, steering forms to be filled out by the doctors in the clinic were experimented with. Drawn up by members of the case work and supervisory staffs, the form was reviewed by some of the doctors to make sure that it was brief and necessitated only checking of recommendations by the doctors. So far it has proved satisfactory and time-saving, but it does not eliminate the need for increased staff.

Besides the opening of the white clinics, the expansion of LSU Psychiatry, the development of the premature unit and the concentration of patients with difficult social problems in the Convescent Home have increased the demands on Social Service. In spite of no increase in the number of workers, attempts were made to provide service, but it was

impossible to allot the number of workers needed to do an adequate job on psychiatry, nor was it possible to assign one worker, without other responsibilities to the permature unit or convalescent home.

As there was no member of the staff qualified as a psychiatric social worker, it was considered desirable to have one of the supervisors qualify for membership in the American Association of Psychiatric Social Workers as soon as possible. This involved carrying a selected case load with consultation from a member of the American Association of Psychiatric Social Workers over a two year period. Tulane School of Social Work agreed to provide consultation and in January, 1947 a shift in supervisory assignments was made to enable the supervisor on the psychiatric service to work toward qualification. If the hospital were certified for funds under the National Mental Health Act it was anticipated that a section of Psychiatric Social Work might be set up and the problem of meeting the demands for case work services on psychiatry could be met.

As soon as funds for the premature unit were available through United States Children's Bureau it was expected that the problem of providing service on the premature unit would be met and that the supervisory load would be lightened as well, for this worker, classified as a Medical Social Worker III, would not only be responsible for the premature unit but the supervision of the workers on Pediatrics as well.

However, the problem of coverage of the Convalescent Home remained.

When the demonstration project of the American Women's Volunteer Service to provide a director of volunteers for the hospital for one year went into effect, it was decided to rearrange supervisory assignments so that one supervisor could be responsible for the volunteers in Social Service. As volunteers were needed to cover the Intake Desk, the supervisor of Intake was also assigned to this work. It was considered important to supervise the volunteers as closely as possible and keep them interested since there was no paid personnel available at the Intake Desk and there was only one paid clerical worker in the file room where three were needed.

Staff

During the year staff turnover continued high, increasing over the two previous fiscal years. For the year ending June 1947, there were 26 resignations and 26 replacements and 2 requests for leave as compared with 24 resignations and 2 requests for leave and 19 replacements in 1946, and 14 resignations and 4 requests for leave with 14 replacements in 1945. Increase in the number of replacements showed that personnel was more readily available than formerly, but the increase in resignations demonstrated the fact that workers did not stay in the department. Because of the experience offered at Charity Hospital worker will join the staff at a low salary for one year; after securing a year of supervised experience they leave for jobs paying better salaries. Until salaries in the department more nearly approximate salaries in the other social agencies locally and nationally, the turnover can be expected to remain high. In February, 1947 Civil Service proposed a change in pay plan for the four medical social work classifications, but this is still pending.

During 1946-47 there were 12 resignations in the professional staff and 14 in the nonprofessional staff while there were 13 replacements in the professional staff and the same number in the non-professional staff. One request for leave was in the professional staff and one in the non-professional staff.

During the year there was one vacancy in the non-professional staff, but the average in the professional staff was four. Because of their inability to work and keep house two workers on the professional staff were on duty part time. Actually, in terms of working hours this was the same as if one position were vacant.

In 1946-1947 two new positions were set up making a total staff of 43; however, the salary of one position was paid for by an outside agency and was not under Civil Service. In September, 1946, the Orleans Parish Unit of the Louisiana Division of the American Cancer Society agreed to pay the salary of a medical social worker as a demonstration project for one year in order to make increased case work services available to patients with cancer.

In June, 1947 a sixth worker was authorized in the Hospital Intake Unit in an effort to cover the accident and admitting departments until 10:00 p. m. at night including Saturdays, Sunday and holidays.

On 3/1/47 Civil Service reallocated positions setting up three Medical Social Worker III and seven Medical Social Worker II with the result that the three Medical Social Workers II were promoted to Medical Social Worker II and seven Medical Social Workers I were promoted to Medical Social Worker II.

Raises effective in July, 1946 were available for all those who had been employed for six months or more, who had performed adequately and who had not reached the maximum.

Case Load

Although the case load fluctuated during the first eight months of the year, there has been a steady increase in the number of cases handled from 2,793 to 4,105, making a total of 38,650 cases handled during the year.

An example of what even one additional worker means to the department is that of the worker sponsored by the American Cancer Society. For the six months period, September 1946 through March, 1947, this worker handled 443 cases. If there had not been two workers on the Tumor Service only a fraction of these 443 patients would have received service for it would not have been possible for one worker on the service to have been able to carry this additional load.

There has been an increase in the number of cases handled each year during the past five years, 30,026 compared to 38,650, which again may be partly due to the larger number of students placed in the department during the last two years.

During the year there were 52,670 contacts with patients or members of their family, an increase of 8,694 over last year. This figure does not show the total number of contacts for again the volume makes it impossible to keep an account of all services rendered.

For the first time this year an attempt was made to keep track of the number of cases referred to various case work agencies in the community. By far the greatest number, 457, were referred to the Department of Public Welfare with the next largest number being 92 patients referred to Louisiana Society for Crippled Children and 55 referred to the Crippled Children's Division of the State Department of Health. Referrals to the other eighteen case work agencies ranged from 1 to 47 cases. Again, these figures do not show the entire volume.

During the year 21,365 patients were interviewed in the Main Social Service Office in addition to 37,394 in the two clinic offices, making a total

of 58,759 patients. Comparable figures were not kept until the last three months of the fiscal year, 1945-46, but a comparison of these figures for the corresponding three months' period also show the marked increase:

April, May, June, 1946—17,323 patients interviewed in all three offices

April, May, June, 1947—23,022 patients interviewed in all three offices

Admitting Program

As the number of patients interviewed by the Hospital Intake Unit during the fiscal year was 17,285, 27% of which were found ineligible, and the number of patients treated in the hospital over this period was 182,382 with only 4,646 or 2½ of this number ineligible, it was obvious that the five hospital intake interviewers could not provide complete or even adequate coverage.

In view of this as well as of the fact that it was believed that many ineligible patients were receiving treatment after administrative hours, a sixth Hospital Intake Unit interviewer was added to the social admitting staff on 1/2/47 so that coverage was provided at night and on holidays. This period was chosen because a review of ward, admissions and patients treated in the accident and admitting departments for a twenty-four hour period on 10/23/46 showed that the largest number of patients applied between 4:30 p. m. and 10:00 p. m. with a much smaller number of patients being seen between 10:00 p. m. and 8:30 a. m. However, since 5/18/47 when the interviewer resigned, no coverage has been possible as a replacement could not be secured because of the hours of work and low salary. The case load of this sixth worker from 1/2/47 through 5/18/47 totaled 383 cases. Of these 19% were ineligible, which would appear to point up need for continuation of coverage of the late shift in the Accident Room, if personnel can be secured. It is interesting to note that the largest number of ineligibles, 226, were the group that were able to pay.

The following two tables show the work of the Hospital Intake Unit as a whole for the fiscal year and includes that of the sixth interview:

No. of Patients Interviewed	No. of Patients Ineligible	Per Cent Ineligible
19,048	5,207	27

	No. of Patients Treated	No. of Patients Interviewed	No. of Patients Ineligible	Per Cent Ineligible
Wards	54,228	3,538	636	1
Clinics	34,339	3,473*	1,622*	5
Accident Rooms	76,258	12,037	2,949	4
TOTAL	164,819	19,048	5,207	3

* Note: These figures include 660 interviews in white admitting rooms during the month of July, 1946.

The table above shows number and percentages according to divisions of the hospital, wards, clinics and accident rooms. The 3% shown as ineligible is generally understood to be the nation-wide average.

Tulane School of Social Work

Forty-four students were placed in the department during the summer, fall and spring semesters; 29 were medical social work students and 15 were psychiatric social work students. This was the largest number of students placed in the department; an increase of 5 over the last fiscal year, the largest placement previously. Besides the prestige attached to being a large training center for students there is a practical aspect, that of assuming responsibility for highly intensive service to a large number of patients. The staff, under pressure already, could never have given the same amount of service to these patients as the students, nor could the staff have assumed responsibility for that many additional cases. Therefore a large student unit means the workers are relieved of some case work services.

As a result of turnover in qualified personnel it was not possible for the department to supervise more than three students during any semester. When the staff becomes more stable it is hoped that responsibility for direct supervision of more students can be assumed.

In April a new unit for the students in the white clinic waiting room was completed. This provided space for ten students, offices for three field work instructors, plus a room for interviewing. It was the first time that definite provision had been made for offices for the field work instructors and for interviewing. This, in addition to the space on the fifth floor, would accommodate a total of 30 students. While this did not meet Tulane's goal of 40 students a semester, it did provide space for more students than it had been possible to take care of before, as well as provide for more comfortable and satisfactory working conditions. It was hoped that if the hospital were able to secure funds through the National Mental Health Act, additional space might be given the psychiatric unit and some space might be allotted to additional psychiatric social work students and instructors.

LSU School of Social Welfare

Besides the field trip which is planned annually for LSU students, cases illustrating the emotional aspects of illness were made available for teaching material.

If LSU secured approval for a two year school and also secured funds through the National Mental Health Act, the department would be used as a training center for psychiatric social work students for LSU as well as for Tulane. This was greatly to be desired since it would not only make the department a larger training unit but would also enable the department to service more cases.

Tulane and LSU Medical Schools

Besides talks to medical students on LSU Pediatrics and LSU Psychiatry, the workers also participated in the teaching program on Tulane Medicine, Tulane Surgery, and LSU Eye. These talks were repeated whenever a new group of students rotated to the service. Depending on the service these talks consisted of a discussion of the function of Social Service, resources in the community, the emotional aspects of illness in relation to organic illness, the social aspects of various diagnoses.

The usual talks were made to the Preventive Medicine Juniors at Tulane, but the series was expanded to two talks for each block of students.

School of Nursing

One supervisor continued to give courses in sociology, as part of the curriculum of the School of Nursing.

School of Dietetics

Various members of the staff continued to talk on the functions of Social Service to each new group of student dietitians.

City-State Joint Training Program

In March the first of a series of discussions on tuberculosis was started for public health personnel. It consisted of a group discussion of the social aspects of tuberculosis with emphasis on the function of the social worker in the hospital setting with illustrative cases given by the supervisor and two workers on the Tuberculosis Service. Twenty students attended the first meeting. There will be three such meetings a year over a period of five years.

STAFF DEVELOPMENT

Supervisors' Meetings

Two supervisors' meetings were held each week.

Staff Meetings

Because of the pressure of work staff meetings were held twice a month.

Participation in Community Organization Committees

Members of the case work and supervisory staffs and the director served on committees of the Council of Social Agencies, including the various committees of the health division, the study committee of the case work agencies, committee on transients, nominating and executive committees.

The department was represented on the Volunteers Advisory Committee, Junior League Occupational Therapy Advisory Committee, Louisiana Legislative Council and local committees of the National Conference of Social Work as well as the executive committee of the Orleans Parish Unit of the Louisiana Division of the American Cancer Society.

Members of the staff served as officers and on committees of the Gulf District, American Association of Medical Social Workers and the Louisiana Conference of Social Welfare. They served on committees of the New Orleans Chapter, American Association of Social Workers, the Cancer Fund Drive, Nominating Committee of American Association of Medical Social Workers and on the Board of the Louisiana Tuberculosis Association and the Urban League.

Talks

Members of the staff participated in interpreting the educational program of the American Cancer Society, Community Chest needs, and the

need of public assistance funds. They gave talks to the New Orleans Council for Exceptional Children, New Orleans Council of Jewish Women, Tulane School of Social Work and Dominican High School. Staff members with local psychiatrists took part in seminars for the American Red Cross.

Relationships with Other Agencies

Vocational Rehabilitation

In order to increase the number of referrals to Vocational Rehabilitation, since it was impossible for the workers on Orthopedics and Surgery to do 100% interviewing of amputees, it was arranged for the medical social consultant with Vocational Rehabilitation, effective 3/13/47, to make weekly visits to the hospital for this purpose. This procedure would not only increase the number of referrals to Vocational Rehabilitation, but would insure, also, that retraining was offered the patient when he was most receptive and before he had a chance to become psychologically unable to lead an active, normal, responsible life again.

It was agreed that Mrs. Stewart, Director, Physical Therapy, would refer to Social Service all patients who, she thought, might benefit from Vocational Rehabilitation. In turn the Social Service Department was to notify Mrs. Stewart of the disposition of the case: already active with Vocational Rehabilitation; why referral to Vocational Rehabilitation might not be possible, or acceptance of case by Vocational Rehabilitation.

Sickles Fund

At the request of Social Service demoral and hexylresorcinal were added to the Sickles Fund and attempts were initiated to request Sickles Fund to carry all of the drugs most frequently prescribed by the doctors in the clinic.

Department of Public Welfare

In order to facilitate exchanging information with the Department of Public Welfare which was needed to establish the eligibility of applicants, a form letter was worked out. While in many ways form letters are not desirable, some time was saved in dictation and typing.

In December, 1946, the New Orleans Home for Colored Incurables was opened with the Department of Public Welfare responsible for intake. Seven patients who had been in Charity Hospital from 12 to 18 months were immediately transferred. This home will, of course, help to relieve the chronically ill problem somewhat but an institution with only 15 beds does not meet the need.

State Department of Health

In connection with the Department of Health, plans for social workers to be attached to the premature unit were worked out. Originally two positions were proposed: one, Medical Social Worker III to be responsible for teaching the medical social aspects of prematurity to medical social work students, nurses and medical students receiving training in the premature station, supervision of the medical social workers assigned to the Pediatrics Service as well as the premature unit, and supervision of Tulane School of Social Work students; the second worker, Medical Social Worker II, to be responsible for treating the medical social problems presented by the families of premature infants at Charity Hospital. Subsequently because of shortage of funds it was agreed that only one position would be possible and the III position was retained with the understanding that the duties of both II and III as outlined would be assumed.

American Cancer Society—Louisiana Division

Besides paying the salary of a social worker, throughout the year the Cancer Society furnished funds to supply transportation, appliances, medication and shelter to patients with cancer on the recommendation of the social workers assigned to the Tumor Service. Dressings for cancer patients were supplied also by the Society.

Long Term Patients

During the year 76 patients had to be kept in the hospital longer than medically necessary because of lack of resources in the community for the chronically ill. Plans were finally effected for all of the patients but only with great expenditure of time and effort and in some instances money.

FUNDS**Patients' Welfare Fund**

The table following shows the expenditures from the Patients' Welfare Fund for the year:

Reason for Using Fund	No. of Patients	Amount
Medication	35	\$ 100.09
Transportation	159	565.02
Shelter and Board (pending clinic visit) ..	94	735.22
Appliances	47	303.77
TOTAL.....	335	\$1,704.10

In spite of drastic attempts to reduce expenditures from the Patients' Welfare Fund, especially in the last three months of the year, expenditures from this Fund were higher than in the preceding year. However, there was fluctuation in the use of the Fund since its establishment as shown in the following table. This may be due in part to the fact that the amount of money available to the Department of Public Welfare for public assistance fluctuates and is never enough to meet the need. The number of patients helped has steadily increased and this really is more important for the Fund was set up to help patients.

Year	No. of Patients Served	Amount
1946-1947	335	\$1,704.10
1945-1946	314	1,633.05
1944-1945	271	1,973.59
1943-1944	142	1,150.10

This year the Patients' Welfare Fund was again used largely for transportation and shelter, the latter for patients attending clinic for the completion of medical care as there are practically no shelter facilities available; and the former to enable patients to return home as there are no agencies which include in their program paying transportation for intrastate residents. In view of this it may be expected that these two items will absorb a large part of the Fund.

Weil Convalescent Fund

During the year the Weil Convalescent Fund was used as follows:

Reason for Using Fund	No. of Patients	Amount
Medication	4	\$ 27.48
Transportation	20	99.40
Shelter and Board (pending clinic visit) ..	38	324.06
Appliances	7	43.46
TOTAL	69	\$494.40

This Fund as well as the Patients' Welfare Fund was used more for transportation and shelter than for medication and appliances and for the same reasons already listed.

There was a marked increase in the use of this Fund, probably due to efforts to limit the use of the Patients' Welfare Fund and increase the use of the other funds as well as to continue attempts to have the term convalescent interpreted more broadly. The continued increase in the use of this Fund both in terms of money and the number of patients helped is shown in the following table:

Year	No. of Patients Served	Amount
1946-1947	69	\$494.40
1945-1946	22	173.35
1944-1945	12	117.65
1943-1944 (6 Mos.)	8	67.00

Because of the fact that it is restricted to convalescents and the amount is limited to five or ten dollars, the Fund will never be used extensively.

Stauffer-Eastwick Fund

During the year the Stauffer-Eastwick Fund was used as follows:

Reason for Using Fund	No. of Patients	Amount
Medication	11	\$ 80.94
Transportation	21	346.65
Shelter and Board (pending clinic visit) ..	56	1,017.67
Appliances	19	156.03
TOTAL	107	\$1,601.29

As may be expected, it, too, was used more for shelter and food and transportation than appliances and medication and for the same reasons previously listed.

The use of the Stauffer-Eastwick Fund has markedly increased since it was established as has the number of patients served. Whenever possible this Fund is, of course, used in preference to the Patients' Welfare Fund.

Year	No. of Patients Served	Amount
1946-1947	107	\$1,601.29
1945-1946	21	374.71
1944-1945 (Est. Apr., 1945)	3	61.00

As this Fund is available for white patients only and those who can be rehabilitated, its scope is not as broad as the Patients' Welfare Fund.

Insulin Fund

During the year the Insulin Fund was used as follows:

Quarter	No. of Patients	Amount
First	30	\$ 50.46
Second	164	344.10
Third	104	259.60
Fourth	155	436.09
TOTAL.....	453	\$1,090.25
July 1, 1946 Cash Balance.....		\$1,805.19
Receipts during year		500.00
		<u>\$2,305.19</u>
Expenditures during year		1,090.25
		<u>\$1,214.94</u>
June 30, 1947 Cash Balance.....		\$1,214.94

Expenditures from the Insulin Fund this year are a little more than twice that of the year preceding. Two factors are believed principally to be responsible: The most important appears the assignment of regular workers to the Metabolic Clinic. These workers, with the aid of volunteers, are able to see early all of the patients in clinic, and thereby reach a larger proportion of the ones needing help. Formerly, when no worker was available, only those patients who were in acute need were referred to Social Service. A second factor is the general lowering of incomes among the patient group, which results in fewer patients being able to bear the expense of providing their own insulin on a continuing basis.

Charity Hospital Guild Fund

Twenty-five dollars was given the department last year by the Guild at the time of Mrs. W. C. Gilmer's resignation. It was agreed that this fund would be reserved for special cases which did not meet the eligibility requirements of the other funds.

During 1945-1946 this fund was used for two patients: \$12 for rent for a patient with an anxiety neurosis and \$3 for a boy to attend a week-end Boy Scout camping trip. During 1946-1947 \$3 was used for the same boy to secure equipment to play football, and \$5 for shelter so that the mother of a child being operated could stay in New Orleans. In all four instances the doctor considered that having these recommendations carried out affected the patient's recovery.

Two dollars remain in this fund.

Social Justice Fund

In June Rabbi Feibleman offered to give Social Service \$5 a month over an indefinite period to be used for patients who did not meet the eligibility requirements of the other funds. Summaries similar to those kept for the other funds would be submitted and Rabbi Feibleman was to be sent a copy.

Total expenditures from the four major funds, Patients' Welfare Fund, Insulin Fund, Weil Convalescent Fund and Stauffer-Eastwick Fund, amounted to \$4,887.04 and helped 964 patients; this is an average of \$407.25 a month spent for an average of 80 patients.

Volunteers

The considerable extension of volunteer service during the fiscal year was due to the fact that the American Women's Volunteer Service financed the salary of a Director of Volunteers on a demonstration project basis. A supervisor in the Social Service Department acted as a liaison between the Director of Volunteers and the Department. She had responsibility for the volunteers in the department, discussing needs and assignments with the Volunteer Director and interpreting procedures and policies of the department to her and the volunteers.

As some knowledge of the hospital and department was thought valuable in terms of insuring some measure of security to the volunteer, an orientation course was planned and given to the new volunteers. It consisted of discussion of the hospital by the hospital administration, its type, the services it renders, its methods of financing; a tour of admitting and accident rooms, clinics and wards; a discussion of the Social Service Department—its functions, its set-up with case illustrations demonstrating the case work services and determination of eligibility; with finally a discussion of the responsibility of volunteers to the hospital and department and of the department to the volunteer.

During the year the Department used 48 volunteers, who gave 2914½ hours during eleven months of the year, for the figures for July, 1946 are not available. They were used in the Main Social Service office at the Intake Desk and in the file room; in the clinic Social Service offices; in the Hospital Intake Unit and as aides on the following services: Eye, Orthopedic, Metabolic, Tumor and Pasteur.

Several of the volunteers served in a dual capacity working on different assignments on different days of the week. Many have dropped out for the duration of the summer with resultant pressures on the clerical staff at the Intake Desk of both the main and clinic Social Service offices.

Participation in Research

The workers took part in a study of transients sponsored by the Council of Social Agencies while the worker on LSU Eye and the students from the Tulane School of Social Work worked on a study of glaucoma.

REPORT OF SOCIAL SERVICE DEPARTMENT

with a member of the LSU Visiting Staff. This included securing social information on every patient with a diagnosis of glaucoma. One of the supervisors was asked to collaborate with the head of the department of Preventive Medicine, LSU, on a paper on Hansen's Disease. As part of the nation-wide study of child health services, information about the work of the department, particularly in relation to the teaching of medical students, was compiled for the American Academy of Pediatrics.

Expenditures

During the year the department handled \$3,998.87 for transportation, medication, appliances, shelter, etc., for patients. This included expenditures through the Patients' Welfare Fund. Of this \$3,998.87, patients paid \$384.81 and \$867.87 was received in reimbursements from patients and agencies.

During the year 495 tickets were purchased for patients, 187 prescriptions for medicine were bought and 87 appliances were secured. This does not take into account the number of prescriptions and appliances secured for patients through referral to other agencies.

In an attempt to prevent the prolonged hospitalization of patients needing extensive dressings, 2,378 packs of gauze, 132 rolls of adhesive and 30 rolls of bandages were given out during the year. This does not include the dressings provided for cancer patients by the American Cancer Society.

Work of Chauffeur

The following shows the number of trips made by the chauffeur during the past fiscal year:

Trips Made by Chauffeur	Number of Trips
Institutions, NOCH, Shelter Homes.....	244
Patients' Homes in New Orleans.....	1,162
Coroner's Office	77
Social Agencies	130
Railroad Stations	325
Bus Stations	168
City Ticket Offices	73
New Orleans Public Service.....	4
Post Office	42
Drug Houses	200
Social Workers on Visits to Patients.....	21
Social Workers to Social Agencies.....	127
Optical Companies	143
Ferry	9
Hospital Service Association	12
Sickles Fund	27
Material delivered to agencies, doctors, etc.....	190
Picking up crutches, magazines, clothes, etc.....	400
TOTAL.....	3,354

Accomplishments

The main accomplishments include the additional worker on the Tumor Service and the additional worker in the Hospital Intake Unit; the additional space for the Tulane School of Social Work which will permit the placement of more social work students in the future. Another achievement which was gratifying was the request for increased participation in the teaching program of the two medical schools in relation to the function of the department and the emotional aspects of illness. As a result of the interest in psychosomatic medicine the department was being asked to give a different type of service on an increasingly larger number of patients than it had formerly. While it posed a problem the request for extended service on Psychiatry and Pediatrics in relation to psychosomatic medicine were satisfying and desirable in terms of the continued growth and development of the department.

Needs

Within Social Service there is a need for a larger staff, both professional and clerical, a psychiatric social work unit, salary adjustments, and more interviewing space. The majority of the workers in the department have had only one year of training; yet for better performance a second year is necessary. Therefore it would be advantageous if it were possible for Social Service to assist these workers to complete their professional education.

Another need is for the department to be able to help workers with the expenses incurred in attending the National Conference of Social Work. Both attendance at professional meetings and additional professional education pay great dividends and are customary practice in social agencies.

Without the department one of the greatest needs in the community is adequate facilities for the chronically ill, the mentally ill and early and advanced cases of tuberculosis. Although there are beds for white patients with early treatable tuberculosis, there are not sufficient beds available for colored patients with early tuberculosis. Lack of such provision in New Orleans and the State made planning long drawn out and sometimes impossible to effect. As a result some patients stay in the hospital indefinitely, tying up beds which might be used for treatable patients. At the same time Social Service has to spend an inordinate amount of time on these patients at the expense of servicing other cases; therefore the work of the department is acutely affected.

Respectfully submitted,

LOUISE MEYER, Director
Social Service Department

REPORT OF THE DEPARTMENT OF PATHOLOGY

July 21, 1947.

Dr. O. P. Daly, Director
Charity Hospital
New Orleans 13, La.

Dear Doctor Daly:

I herewith submit the annual report of the Department of Pathology of Charity Hospital at New Orleans for the year closing June 30, 1947.

The Department wishes to express appreciation to the Director, to the Administrative Staff, to the Board of Administrators and to other Departments of the Hospital for their cooperation and assistance.

We wish also to express appreciation to our Visiting Staff of Pathologists and Scientists from Tulane University School of Medicine and Louisiana State University School of Medicine for the faithful fulfillment of all responsibilities and obligations.

To my own professional, technical and secretarial staffs I am deeply grateful for their loyalty and untiring devotion to duty.

Respectfully submitted,

EMMA S. MOSS, M. D., Director
Department of Pathology

REPORT OF THE DEPARTMENT OF PATHOLOGY

REPORT OF HEART STATION ELECTROCARDIOGRAPHIC LABORATORY

July 1, 1946—June 30, 1947

July 8, 1947

Dr. O. P. Daly, Director, Charity Hospital, and
Board of Administrators of the Charity Hospital,
New Orleans, Louisiana.

Dear Sirs:

The accompanying report shows the work done by the Heart Station from July 1, 1946 through June 30, 1947. The figures refer to the number of electrocardiograms in each respective month. Many sound tracings with electrocardiograms and fluoroscopic examinations of the heart were made also in the current year but the breakdown for months is not available although the data was placed in the patients' records.

July	1,137	January	1,220
August	1,181	February	1,230
September	1,075	March	1,470
October	1,063	April	1,243
November	943	May	1,419
December	965	June	1,242
Total			14,188

LOUIS LEVY II, M.D.

ELECTROENCEPHALOGRAPHY DEPARTMENT

Sept. 18, 1947

Dr. O. P. Daly, Director,
Charity Hospital of Louisiana,
New Orleans, La.

Dear Dr. Daly:

Below is given a table of the number of electroencephalograph patients done per month on both private and charity patients. Separate figures are given for adults and children for the fiscal year July 1, 1946, to July 1, 1947. Although our equipment still does not function without periods of repair, for this fiscal year we had a larger number of patients than in previous years. The total this year is 523, and last year it was 455. There has been this increase in spite of the fact that no private patients have been run since about the first of February.

	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June
Adults	23	38	19	39	27	29	20	20	17	35	35	20
Children	20	22	15	15	17	4	12	11	15	35	21	11
Total	43	60	34	54	44	33	32	31	32	70	56	31
Total Adults.....												325
Total Children												198
Total												523

August 4, 1947.

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans 13, Louisiana

Dear Dr. Daly:

The Anesthesia Department was called upon for increased services during the current year 1946-1947. There was a steady increase in the amount of oxygen used through the hospital. This was particularly noticeable in the premature infant units and the pediatric departments.

The reopening of the Delgado Operating rooms in March called for an increase in anesthesia service. New manometers and other accessories were purchased to completely equip the operating room for anesthesia. Anesthesia apparatus was reconditioned so that the department can now boast of the most modern and up-to-date equipment available. Although an increase in personnel was necessary to staff the department because of the expansion, no new employees were added. The staff was supplemented entirely by student nurses and residents. The shortage and the rapid turnover of graduate nurse anesthetists which has been faced since the war began continued throughout the year.

The following is a summary of the total and various types of anesthetics administered:

Ether	5,554
Nitrous oxide	145
Ethylene	2,665
Cyclopropane	1,927
Vinethene	33
Pentothal	210
Pentothal and Inhalation.....	76
Spinal	2,720
Local	2,478
Other	294
	<hr/>
	16,102

Sincerely yours,

JOHN ADRIANA, M. D., Director
Department of Anesthesia.

August 4, 1947.

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans 13, Louisiana

Dear Dr. Daly:

There was a progressive increase in the demand for blood during the year beginning July 1, 1946 ending July 1, 1947. The doctors on the house staff are to be commended for their successful and sustained efforts in soliciting blood from friends and relatives of patients, inasmuch as there is some reluctance on the part of the public to give blood. This is particularly true of the colored donors.

The bleeding station was removed from Rooms 12 and 14 to Room 11 to make room for the white orthopedic clinics. It was with regret that this change was made, since these quarters were commodious and spacious and well suited for our purpose. The new quarters are less spacious and it is difficult to segregate white and colored donors. On busy days in the Donor Station one cannot help being reminded of South Rampart Street on a hot and sultry Saturday night.

A new type candlestick filter adaptable for the Upjohn dispensing equipment for transfusion of blood was developed and introduced. The difficulty in controlling reactions continues due to the divided responsibility in intravenous therapy between the Blood Bank, Central Service and the Pharmacy.

The mobile unit made two trips during the entire year. One, to Metairie, was sponsored by The American Legion Auxiliary. Ten units of blood were obtained there. The other, in Raceland, was arranged by the hospital blood bank. Ninety units of blood were obtained there.

The Red Cross donated over 4,000 units of dried plasma gratis. The preponderance of whole blood transfusions to plasma infusion continues to be in the ratio of 25-30 to 1. Not only is plasma ineffective in cases of shock, but reactions and homologues serum jaundice follows its use.

Approval for the employment of four externs for typing and matching was obtained. These externs remain in the Bank at night and Saturdays and Sundays. Thus 24-hour service, seven days a week, is now rendered by the laboratory of the bank.

The following is a statistical summary of the activities of the past year:

Recipients typed	29,393
Blood Donations (Units)	15,883
Transfusions	14,425
Donations showing Positive Wasserman Reactions.	654
Donations remaining for Plasma or not suitable..	804

Sincerely yours,

JOHN ADRIANI, M. D. Director
Department of Anesthesia.

ANNUAL REPORT

CHEST X-RAY UNIT—CHARITY HOSPITAL

This annual report for the year July, 1946 through June, 1947 represents the second full year that the Chest X-Ray Unit at Charity Hospital, New Orleans, was in operation. During this time a total of 24,426 small films was taken. The readings on these films are classified as follows:

Shadows very strongly suggesting tuberculosis...	51	} 3.9%
Shadows suspicious of tuberculosis.....	897	
Shadows suggesting pathology other than tuberculosis	882	
Negative	22,596	
Total.....	24,426	

It should be noted that the over-all total of 24,426 small films represents a decrease of 6,342 from the previous year's total of 30,768. An explanation of this decrease will be taken up later in this report.

Analysis of the above figures, representing the breakdown of the total by "X-ray impression", shows that 938 persons or 3.9% of those X-rayed had X-ray findings on a small film very strongly suggesting or suspicious of tuberculosis. It is interesting to note that this figure of 3.9% is almost identical to the figure of 4% given in the annual report for 1945-1946.

It is axiomatic to say that those individuals found to have abnormal shadows in their chest films should be further examined by clinical, radiological, and laboratory methods to complete the diagnosis. The earlier the disease is found, the better the prognosis, both for the patient and for his constituents.

I believe a breakdown of the total number of small films taken according to month and X-ray impression would be of great interest and would also help to explain the over-all decrease in number of films this year as compared to last. This is given below.

	T.	S.	O.	N.	Total
July, 1946	10	122	76	3179	3387
August, 1946	9	90	98	2715	2912
September, 1946	4	105	98	2582	2789
*October, 1946	1	39	59	1331	1430
November, 1946	2	22	17	471	512
December, 1946	2	28	45	750	825
January, 1947	4	60	73	1638	1775
February, 1947	1	76	91	2101	2269
March, 1947	6	90	93	2531	2720
April, 1947.....	4	108	91	1928	2131
May, 1947	2	95	84	1770	1951
June, 1947	6	62	57	1608	1733

* Unit moved to basement October 9th. Re-opened October 21st.

It is obvious from these figures that the monthly totals after the X-ray unit was moved to the basement have never equaled the totals reached before this move was made. The physical difficulties involved in getting patients to the new location is one of the principal factors causing this decrease.

In January, 1947 a survey of hospital personnel was begun and to a large extent completed in March, 1947. One thousand three hundred and thirty-seven hospital employees had chest films taken. Forty-three had findings suspicious of pulmonary tuberculosis and forty-four had evidence of chest pathology other than tuberculosis. As the follow-up of these people was the responsibility of the hospital and not a function of the X-ray unit, the final results are not known to the Tuberculosis Control Section.

In May, 1947 it had become quite evident that the chest X-ray unit was not giving adequate service to Charity Hospital in screening the maximum number of out-patients and admissions for possible chest pathology and, therefore, a study was undertaken by Miss Agnes McGraw, Nurse Supervisor of the X-ray unit, to determine the source of the patients who did come to the unit. Her findings for the month of May, 1947 were as follows:

1. Patients referred to unit by hospital admitting physicians....	60
2. Ambulatory admissions from admission baths.....	630
3. Hospital Personnel sent through the Charity Hospital Personnel Department	92
4. Voluntary applicants for X-rays and those referred by physicians outside the hospital.....	423
5. Trainees from Vocational Rehabilitation Division of Department of Education	21
6. Contacts sent in by Public Health Nurses and Department of Social Service	75
7. Pre-Natal cases from white and colored obstetrical clinics....	650
Total for May, 1947.....	1951
Total small films for May, 1946.....	3110

The important facts ascertained from this study were that (1) only 630 ambulatory admissions were X-rayed and (2) only 60 patients were referred to the unit by the hospital admitting physicians during the month. This again pointed up the fact that the unit was not doing what it was primarily supposed to do—protect the hospital medical and nursing staffs from silent, undiagnosed cases of tuberculosis admitted for other medical or surgical reasons. And until such time as the taking of a small film on all out-patients and admission to the hospital is made as routine an admitting procedure as the taking of a blood specimen for serology, the hospital will not receive the maximum benefit of this photofluorographic unit.

The Chest X-Ray Unit has continued to function under the direct supervision of the Tuberculosis Control Section for the past year and all expenses and salaries borne by it. The budget for the fiscal year 1946-1947 was as follows:

Salaries:

Graduate Nurse II	\$ 1,680
X-Ray Technician II	1,800
X-Ray Technician I	1,200
Medical Records Librarian	1,500
Consulting Radiologist (P. T.)	1,800
Typist Clerk I	1,080
Typist Clerk I	1,080
Attendant II	960

Other Expenses:

Contractual Services	200
Supplies and Materials	1,450
Equipment	920

Total.....	\$ 13,670
------------	-----------

A careful review of the operation of the X-ray unit and the work accomplished during the past year brings to light the following points:

1. The maximum benefit to the hospital cannot be obtained with the Chest X-Ray Unit remaining in its present location in the basement. The ideal location for a screening procedure of this type is adjacent to the Admitting Waiting rooms so as to interfere as little as possible with the admitting procedure and at the same time be readily available to all patients seeking medical attention.
2. It is not only admitted by this Section but proposed that the Chest X-Ray Unit be placed as soon as possible under the direct supervision and control of the doctor in charge of the Admitting Office, and thereby helping to make the unit an integral part of the out-patient and admitting staff. The present staff operating the unit has been working together for some time now and requires only a minimum amount of direct supervision.
3. In order to provide more adequately the service for which this unit was set up the following routine procedure is recommended:
 - a. Every person applying to the hospital for medical care be sent immediately to the unit for a chest film.
 - b. After a small chest film has been taken (this information to be stamped on the patient's admission slip), the patient to return to the receptionist for routing to the proper clinic.
 - c. During the hours that the unit is open (7:30 A. M. to 3:30 P. M.) no patient to be seen by an admitting or clinic physician unless a small chest film has been taken. Obvious exceptions to this rule would be acute medical or surgical cases, young children, communicable disease patients, etc.

Respectfully submitted,

TERRELL O. CARVER, M. D.,
Acting Chief
Tuberculosis Control Section
Division of Preventive Medicine

REPORT POLIOMYELITIS CENTER**July 1, 1946 to June 30, 1947**

The Poliomyelitis Center is operated jointly by the Section of Crippled Children Services, Louisiana State Department of Health and Charity Hospital. It is financed by funds obtained from the various parish chapters of the National Foundation for Infantile Paralysis, Inc.

It has a capacity of 70 beds, with a personnel of 33 workers, i.e.:

- 6 graduate nurses
- 12 attendants
- 11 maids
- 1 physical therapist
- 1 secretary
- 2 porters

The Poliomyelitis Center occupies 3 floors in a building formerly white female brick building at Charity Hospital. The first floor is used by the physical therapy department. It is also used as a recreation center where the patients can entertain themselves or be entertained with special parties, moving pictures, or amateur plays presented by various groups interested in the patients.

The physical therapy department is equipped with a number of apparatuses to aid the patients in regaining muscle function. There are bicycles of various sizes, stairs with hand-rails, physical therapy tables, walkers of different sizes, and many other devices which were mainly supplied by funds obtained from the National Foundation for Infantile Paralysis, Inc.

On this floor also is a room used by the Staff physicians for research work.

The second floor is occupied by convalescent patients. On this floor is the office used by the doctors and nurses and medical social worker. This office is equipped with a 3-way phone system connecting with all floors. The class room is also situated on the second floor. This has been a recent addition. It is well equipped and pleasantly lighted. The patients are instructed by a teacher from the Orleans Parish School System. This facility enables the patients of school age to keep up with their regular school work while they are in the hospital.

The isolation ward is located on the third floor. All new patients are admitted to this ward and are kept in isolation for 14 days. On this floor are situated the hot pack rooms, treatment rooms, and a laboratory for use of the doctors, also a kitchen. (Food is sent from the main Charity Hospital kitchen to this room where it is prepared and distributed to the patients.) In this kitchen is an electric dishwashing machine.

The whole building is equipped with all modern facilities. There are two portable iron lungs in readiness at all times. These were donated by the National Foundation for Infantile Paralysis, Inc. A standard Drinker-Collins respirator, on loan from Charity Hospital, is also among the equipment on hand.

From July 1, 1946 to June 30, 1947, 231 patients entered the Poliomyelitis Center. Of this number, 63 were from Orleans Parish. Of the 231 patients, 28 were found not to have poliomyelitis and were either transferred to Charity Hospital or discharged to their homes. In the years 1946 and 1947, there were 11 deaths for the entire patient group.

Orthopedic surgeons and pediatricians from Tulane, L. S. U., and Independent Services are available at all times. When patients are discharged to their homes they are referred by the orthopedic surgeon to the Section of Crippled Children Services permanent clinics for follow-up care. If braces and appliances are requested by the orthopedic surgeon while patient is in the hospital or under care in the permanent clinics, these are provided by the Section of Crippled Children Services, Louisiana State Department of Health.

Fortunately the incidence of poliomyelitis has been lower this year than it has been since the Poliomyelitis Center was established. According to statistics obtained from the State Department of Health, there were for the entire state, 135 cases reported in 1945; 382 in 1946; and in 1947, 18 new cases as of August 8. For the nation as a whole, there were 220 cases reported for the first two weeks in July, bringing the total for this year to 1421 cases as compared with 2590 cases for the same period last year.

W. L. TREUTING, M. D.
State Health Officer

REPORT OF POLIOMYELITIS CENTER

July 1, 1946 to May 7, 1947

The problem of supplying services for the care and treatment of acute Poliomyelitis cases occurring within the bounds of Louisiana has at this time been definitely demonstrated over a period of four years of successful operation. The Poliomyelitis Center it must be remembered was established during the period of World War II, and has treated cases here in New Orleans from practically every parish in the state, with an average number of 110 cases each year—1946-47 was the exception, in which 360 cases were admitted. This represents 93% of all cases that were reported within the state.

The Poliomyelitis Center was originally set up for the care of only twelve cases, and during the 1946-47 period, where case instance occurred in epidemic proportion the Center was compelled to enlarge its facilities by providing extra wards to care for the emergency that came on suddenly and rapidly, especially during the months of July, August, September and October. At one period during these months the capacity census showed 116 cases being handled. The providing of facilities for adult cases was indeed a great problem, since the increase in age group of adult type of Polio was 10%.

The proportion of severe, or the Bulbar spinal type, of cases showed a slight increase in number as compared with previous years at this institution. The severe Bulbar type requires a much greater amount of work on the part of physicians, nurses and other auxiliary aides. Here in most cases it means life or death. The improved Technique, and more skillful handling of these cases by physicians and nurses probably accounts for the decrease in percentage of deaths from this particular type of case.

The percentage of deaths of the Bulbar type during 1946-47 was 19.1%. The initial year of operation showed that 50% of the Bulbar cases died.

The Polio Center during 1946-47 was a center of much activity in the attempt to supply adequate services to this large number of cases. Much of the equipment was subjected to a great amount of strain. New equipment that was available and could be obtained was secured, some being borrowed and other purchased. The shortage of nurses was one of the great encounters. Thus an emergency was declared by the State Health Department, which resulted in calling on the American Red Cross and The National Foundation for Infantile Paralysis, Inc., and from the latter through its Parish Chapters more funds were obtained to supply the extra salaries, travel, housing, etc., for the nurses sent in to care for the increased number of cases. The Charity Hospital in like manner increased its supplies and facilities in order to meet the emergency.

In addition to supplying medical, nursing and physical therapy care, the social phase was not neglected. Periodic parties and various forms of entertainment were provided, which included Stars from Hollywood, performers from the Ringling Circus and the Shriners' Circus. Many other professional entertainers appeared before the patients in the Polio Center to make their stay as enjoyable as possible while receiving treatment.

BRANCH J. AYMOND, M. D.

REPORT OF DEPARTMENT OF ALLERGY

To The Honorable Board
Charity Hospital
New Orleans, La.

Gentlemen:

I hereby submit this my final report on the work accomplished in the Allergy Department. From July, 1946 to July, 1947, we treated 6,283 patients, including 94 new patients.

I am very happy to leave the service in such flourishing condition. Charity Hospital had the honor of establishing the first Hay Fever clinic in the world. It was my privilege to be a co-worker of the late Dr. Wm. Scheppgrell when he inaugurated this work in 1918, though the foundation for it had already been started by him two years before. The service extended so rapidly that in 1930 it was found necessary to divide the clinics between L. S. U., Tulane and Independent. After Dr. Scheppgrell's untimely death in 1928, your Board honored me with the directorship, an honor which I deeply appreciated, first, for serving the public and next, it gave me opportunity to continue Dr. Scheppgrell's pioneer work.

In looking over the previous report from 1918, I was able to collect the exact data. The exact figures from 1921 to 1939, total 100,821, added to this the estimated number for the unpublished years, we have a total of 133,821 patients treated. The results obtained in these cases has always been from 15 to 20% clinically well, 70% improved.

During the long life of the clinic we were able to carry on researches as follows:

Effect of Digestive Juices on pollen injected.

Coordination of Platelet count to the Allergic process.

Value of enteric coating in oral therapy.

Beneficial effect of Penicillin Suspension in Bronchial Instillation.

Contra-indication of Sulfathiazole application and the Bronchial Tree.

Corroborated the beneficial effect of parenteral dust extract in certain allergic conditions.

In summing up our experience, however, we have always had to rely on the standard pollen extract in relatively large doses for the definite control of Hay Fever and Asthma.

In conclusion I again wish to thank the Board not only for the 29 years spent in the Allergy Clinic, but previous to this for the privilege of serving the Charity Hospital in various capacities from 1899 to 1947.

Respectfully submitted,

NARCISSE F. THIBERGE, M. D.,
Chief, Allergy Clinic

LUNG STATION

July 3, 1947.

Dr. O. P. Daly, Director
The Charity Hospital of Louisiana at New Orleans
New Orleans 13

Dear Dr. Daly:

During the past fiscal year the Lung Station was without a technician for five months. This limited the services which could be offered throughout the year. Despite this handicap, the station has not only carried out more routine studies of pulmonary functions, but also has engaged in more investigative work than during the previous year.

Objective evaluation of bronchodilator drugs in asthma was continued.

A tabulation of the year's work follows:

Spirography and Spirometry.....	52
Bronchospirography	27

ANNUAL REPORT OF THE RECORD LIBRARY

July 21, 1947.

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, Louisiana

Dear Dr. Daly:

The annual report of the Record Library for the fiscal year 1946-1947 is herewith submitted.

I feel that we have had a very satisfactory year and that we can look forward to further improvement in the coming year.

The Record File Room was cleared of all charts except Unit Records. The old charts were placed in storage file rooms. In the near future it will become necessary to consider micro-film or some other method of condensation of charts. At the rate of our present growth, our main File Room will be completely filled in approximately two years.

By the end of 1947 we hope to have completed key punch cards on all of the charts since 1942. This will give us a splendid index guide for research and statistical purposes. The research field is one for which our records are most valuable. It is interesting to note the increase along this line during the past year, as follows:

	1945-46	1946-47
No. of charts pulled for research.....	185,000	252,000
No. of diagnoses requested	152,000	198,000
No. of publications in Scientific Journals from this work..	110	137
No. for Boards of the American College of Surgeons.....	42	61

The number of admissions to the hospital has increased from 46,949 in the past fiscal year to 54,229 for this reported year. The number of treatments given in the Accident Room has increased from 119,109 in 1945-46 to 136,729 in 1946-47.

The increase in the use of charts makes a definite increase in the work of the Record File Room, which reports 530,225 charts filed during the year, with 463,231 filed for the previous fiscal year.

With the re-opening of the Clinics on the West wing the personnel of the Department was increased by four clerks.

Respectfully submitted,

EDDIE V. COOKSEY, R. R. L.,
Record Librarian.

Dr. O. P. Daly, Director
Charity Hospital of La.
New Orleans, La.

Dear Dr. Daly:

The following is the report of the Pharmacy Department for the year ending June 30, 1947.

Special Prescriptions filled.....	78,210
Narcotic Prescriptions filled.....	7,460
Stock Prescriptions filled.....	85,200
Penicillin Prescriptions filled.....	50,200

Serums and Antitoxins Purchased

Antisheep Hemolysin, Glycerinized—5cc.....	1 Vial
Antigen Kolmer C. L.—5cc.....	1 Vial
Anti Hemophilus Serum, Type B.....	180 Vials
Anti Pneumococcic Serum, Type 4—20,000 units.....	10 Vials
Antivenin North American Anti Snake Bite Serum.....	6 Vials
Antivenin Black Widow Spider Serum.....	3 Vials
Brucellergin—1cc.....	10 Vials
Catarrhal Vaccine, Combined—20cc V-151.....	60 Vials
Cholera Vaccine V-863.....	2 Vials
Coli Combined Vaccine V-196.....	30 Vials
Diphtheria Antitoxin—10,000 units.....	174 Vials
Diphtheria Antitoxin—20,000 units.....	774 Vials
Diphtheria Toxoid, Alum Precipitated V-907.....	21 Vials
Diphtheria Toxin for Schick Test (100 tests) V-928.....	40 Vials
Diphtheria Toxoid-Tetanus Toxoid, Alum Precipitated V-914.....	80 Vials
Frei Antigen.....	10 Vials
Gas Gangrene Antitoxin, Polyvalent, Therapeutic.....	124 Vials
Hyper Immune Human Pertussis Serum.....	40 Vials
Influenza Virus Vaccine Types A & B V-320.....	20 Vials
Meninococcus Antitoxin 10,000 units—Bio. 168.....	20 Vials
Mixed Vaccine Respiratory Infections (M.V.R.I.) 20cc.....	130 Vials
Parathyroid Extract—5cc.....	70 Vials
Pertussis: Anti Pertussis Serum, Rabbit.....	15 Vials
Pertussis Vaccine, Prophylactic, Alum Precipitated V-386.....	30 Vials
Plague Vaccine 20cc.....	2 Vials
Scarlet Fever Streptococcus Antitoxin for Schultz-Charlton Test—Bio. 151.....	20 Vials
Scarlet Fever Streptococcus Toxin for Dick Test—2cc.....	5 Vials
Small Pox Vaccine V-5.....	40 Vials
Snake Venom Solution (Mocassin) 10cc—1:3000.....	3 Vials
Staphylo-Lysate L-955—20cc.....	1 Vial
Staphylococcus Aureus Vaccine V-627.....	1 Vial
Tetanus Antitoxin 1500 units.....	33,800 Vials
Tetanus Antitoxin 10,000 units.....	100 Vials
Tetanus Antitoxin 20,000 units.....	500 Vials
Tetanus Gas Gangrene Antitoxin, Prophylactic.....	2,250 Vials
Tetanus Toxoid, Alum Precipitated V-932.....	30 Vials
Trichinella Extract—5cc V-735.....	10 Vials

Triple Typhoid Vaccine 5cc, 100 million bacteria per cc.....	300 Vials
Tuberculin Concentrate, O. T.....	22 Vials
Tularensis B—No. 6702.....	16 Vials
Tularensis Antigen.....	8 Vials
Typhoid Mixed Vaccine 20cc V-765.....	70 Vials
Typhus Vaccine V-796.....	2 Vials

Arsphenamines Purchased

Bismarsen 0.2 Gm. (Without Solvent).....	500 Amps
Mapharsen 0.04 Gm.....	1,500 Amps
Mapharsen 0.06 Gm.....	1,500 Amps
Mapharsen 0.4 Gm.....	200 Amps
Mapharsen 0.6 Gm.....	800 Amps

MISS NELLIE BOUDREAUX,
Supervisor.

CHARITY HOSPITAL GUILD REPORT

Honorary Presidents	Sister Stanislaus Mrs. C. Warren Gilmer
Supervisor	Miss Nellie Boudreaux
Treasurer	Mrs. D. N. Barr
Corresponding Secretary	Miss Adele Reynaud

Chairman in Charge of Meetings:

Monday	Mrs. George A. Chehardy
Tuesday	Mrs. Charles Richards Mrs. D. N. Barr
Wednesday	Mrs. H. C. Browning Mrs. A. A. Boyle
Thursday	Mrs. L. P. LaPoutge Mrs. Charles Chehardy
Friday	Mrs. John Nix Mrs. George A. Chehardy

Since the retirement of Mrs. C. Warren Gilmer as President of the Charity Hospital Guild, the work has been carried on under the able supervision of Miss Nellie Boudreaux. Much credit is due Miss Boudreaux for her faithful and untiring efforts to keep up the work which is being done by the good ladies who so generously give their time and perform such a wonderful service for Charity Hospital.

ANNUAL REPORT

of the

CLASSES FOR CONVALESCENT CHILDREN

Doctor O. P. Daly, Director

Charity Hospital of Louisiana at New Orleans

Dear Sir:

The Annual Report of the Classes for Convalescent Children, sponsored by the Orleans Parish School Board, is herewith respectfully submitted:

Since September 28, 1923, the Orleans Parish School Board has provided professional teaching service for the convalescent children confined to the wards of Charity Hospital. At the present time the services of the three following teachers are provided:

Selma L. Klein, B. A., M. A., Instructor, Class for White Convalescents
 Emma Mae Turner, B. A., M. A., Instructor, Class for Crippled Children, Polio Unit

Louella Cavalier, Instructor, Class for Colored Convalescents

Teachers, books, and all teaching equipment and aids are furnished by the School Board, while classroom facilities and maintenance, including the services of two assistants, are provided by the Hospital.

Assistants:

Class for White Convalescents, Effie Brandon

Class for Colored Convalescents, B. Heno Foster

The teacher at the Polio Unit has no classroom facilities and does bedside instruction only. Since one of the most serious handicaps of the hospitalized child is the limitation of normal social and cooperative relations, it is earnestly hoped that a classroom will be provided for polio convalescents in the near future.

ENROLLMENT

During the period July 1, 1946 to June 30, 1947, our records reveal the following school census:

Class for White Convalescent Children		Boys	Girls	Total
1. Total Enrolled		408	282	690
2. Average Daily Enrollment ..		21	13	34
Class for Colored Convalescent Children				
1. Total Enrolled		203	166	369
2. Average Daily Enrollment ..		17	16	33
Class for Crippled Children, Polio Unit				
1. Total Enrolled		64	44	108
2. Average Daily Enrollment ..		8	6	14

INSTRUCTION

Inasmuch as a large part of the well child's time is spent with his fellows in an organized school, the continuance of this daily participation in school activities is of vital importance for the hospitalized child. Despite convalescent conditions a regular academic course of study is followed. While the course of study is, on the one hand, modified in accordance with the physical condition of the pupil-patient, it is on the other hand implemented by many activities particularly suited to the convalescent child.

Because the pupil turnover in the hospital is so great the teacher is virtually unable to measure scholastic progress. It should be pointed out, however, that a hardly less important objective is the maintenance of a wholesome psychological atmosphere for the child. There is abundant evidence that the hospital school does afford the child a feeling of achievement and accomplishment comparable to that given by the schools outside. When the discharged child returns to regular school the educational process has been a continuous one.

In the Polio Unit, for instance, where lengthy hospitalization is the rule, the instructor was able to assist a young boy to earn sufficient credits to receive his high school diploma at the same time his former classmates received theirs.

LIBRARY

Library books not only enrich the curriculum and supply reference material, but also provide worthwhile use of leisure time. The library shelves and mobile book carts are an integral part of the school program. This year, as in the past, the Orleans Parish School Board has made general provision of funds for the purchase of additional library books.

Class for White Convalescent Children

Allotment for books from State Department of Education.....\$ 90.50

Class for Colored Convalescent Children

Allotment for books from State Department of Education.....\$ 65.00

Class for Crippled Children, Polio Unit

Allotment for books from State Department of Education.....\$ 17.50

Class for Colored Convalescent Children

The Zeta Phi Beta Sorority gave a pair of book ends and appropriated one hundred dollars (\$100.00) for the purchase of library books during Children's Book Week. Individual donors also donated this class a charging tray, guide card box and twenty-nine dollars (\$29.00) for the purchase of books.

AUDIO-VISUAL AIDS

Through the effective use of audio-visual materials the child's life is enriched with beautiful, permanent and satisfying experiences. The program includes the use of weekly moving pictures, film strips, slides, opaque projections, recordings and singing with piano accompaniment. During the present year the following donations were made to supplement this important service:

Class for White Convalescents

The Happiness Helpers donated an Artone Combination Victrola Radio for the Christmas Holiday. The same group gave eighteen (18) music recordings for Easter, 1947.

Mrs. Edward Randolph, Jr., gave the class two volumes of recordings.

Mrs. Edward Price Bell gave a large and most interesting collection of old post cards from foreign countries.

Class for Colored Convalescents

An R. C. A. Radio and three recordings were donated by Rev. and Mrs. J. Stewart of Los Angeles, California.

HANDICRAFTS

Happiness is the first right of every child, and whatever contributes to the genuine happiness of the sick child contributes to his education. The simplest creative accomplishment is a source of joy to him. With this objective in mind, a special portion of each day is given over to manual activities. At this time materials, such as weaving, games, paints, clay, reed, worsted and needles, are provided and the child has the use of these without emphasis upon the end results. No activity in the school program is as effective in producing wholesome adjustment and individual accomplishment.

RECREATION

Recreation through participation in such social activities as parties and entertainments helps the sick child to bridge the gap between the home and the hospital. The following is a list of the parties held in the hospital this year:

Class for White Convalescent Children

Oct. 18—Refreshments and mammoth cake from Mr. and Mrs. Max Marx who celebrated their fortieth anniversary.

Oct. 15—Eight cartoons were shown by Mr. Leo D. Bactell.

Oct. 31—Halloween Party given by Grey Ladies of the American Red Cross.

Nov. 12—Travel films shown by visitors from Washington State.

Nov. 22—Thanksgiving Party given by Grey Ladies of the American Red Cross.

Christmas Parties

Dec. 15—Dominican High School gave a short play and refreshments.

Dec. 18—Entertainment and party given by Cruisers' Auxiliary of Veterans of Foreign Wars.

Dec. 19—Visit by Santa Claus; toys and refreshments furnished by Grey Ladies of the American Red Cross.

Dec. 20—Metairie Women's Club: Movie, magic and refreshments.

Dec. 21—Elks' Christmas Tree Celebration with distribution of gifts.

Dec. 22—Party given by Algiers Heros-Coast.

Dec. 23—Movie and carols.

Feb. 14—Valentine Party given by Grey Ladies.

Feb. 22—George Washington Party. Grey Ladies.

Mar. 17—St. Patrick's Day Party given by Mrs. J. T. Nix.

Easter Parties

- Apr. 5—American Legion Junior Unit Auxiliary, Metairie.
 Apr. 7—Easter Egg baskets distributed by Grey Ladies. Refreshments.
 Apr. 8—Judie Cootiette Club No. 60, Veterans of Foreign Wars Auxiliary.
 Apr. 9—Munholland Methodist Church.
 May 3—May Day Party. Mrs. J. T. Nix.
 June 3—Confirmation Party.
 June 8—Memorial party given by Miss Edna Faust and Mrs. K. Ruch.
 July 4—Party. Mrs. J. T. Nix.

Class for Colored Convalescent Children

Halloween Party.

- Nov. 12—Travel film by visitors from Washington State.
 Dec. 18—Christmas program with gifts and refreshments. Sunshine Helpers.

Other Christmas parties were given by:

1. Dilliard University Student Nurses.
2. Loyola University Student Nurses.
3. Christian Charity Association.

Feb., 1947—Dog Show arranged by Mr. Philip McCabe.

May, 1947—Spring Party.

June, 1947—Entertainment through courtesy of Radio Station WWL.

June, 1947—Birthday party for children born in June.

MISCELLANEOUS DONATIONS

Class for White Convalescent Children

This year, through the Children's Bed Endowment Fund, the classroom was furnished with eight round light oak tables and thirty-two chairs. The addition of this furniture enhances the attractiveness of the cheery solarium.

Class for Colored Convalescent Children

In October, 1946, the Sunshine Helpers made twenty-two pairs of pajamas for the youngsters.

May, 1947, Mrs. L. P. Hills and Mrs. R. Wilson of Shrewsbury, La., made the class a gift of slippers.

We would like at this time to express our appreciation to the Board of Administrators, Sister Margaret, and to the medical and nursing staff for their unflinching interest in and assistance to the school.

Respectfully submitted,

SELMA L. KLEIN, Instructor
 Class for Convalescents

CHARITY HOSPITAL MEDICAL AND PATIENTS LIBRARY

July 22, 1947.

ANNUAL REPORT—JULY 1, 1946-1947

Since its inception in October, 1945 the Charity Hospital Medical and Patients Library has grown from an experimental to an approved project, expanding its services to all in-patients and medical staff, increasing its book collection and circulation, and enlarging the staff and volunteer corps.

During the past fiscal year the Medical and Patient sLibrary spent \$1,484.75 from the Henderson Fund allotment and \$132.00 from the Sister Stanislaus Fund. Of this amount \$1,442.50 was spent for books and \$51.60 for popular periodicals. \$123.66 was paid New Orleans Public Library for lost and damaged books. Recreational reading, selected with the patient in mind, is purchased from Trust Funds, while medical books and periodicals are purchased from the Medical and Surgical Care Funds. Of the 73 medical periodicals received, 13 are gifts. The 22 popular periodicals are subscriptions.

Acquisitions show that of the 1840 books now in the library, 1250 were added since June, 1946, and while 952 were bought, 322 were entered as gifts. The total collection does not as yet meet the minimum requirement of 6 books per bed, or about 12,000 books.

Circulation statistics show that in the past year the library circulated 10,602 books, a monthly average of 883 with a peak of 1305 for March. The Medical staff borrowed 1215 periodicals and 1892 books. The attendance for the year was 6,677.

The Medical and Patients Library increased its services and now reaches all bed patients in the Convalescent Home and the main building, with the exception of Pediatrics. In August, 1946 the book truck began servicing patients in X-Ray and Radium and Neuro wards. The library now offers two other services to "eye" patients, a "talking book" and a Readers Service. Two sound recorders on indefinite loan from the Welfare Department, Division for the Blind, are used. By borrowing the talking machine, literally reading books, the patient quietly listens to the records. Manufactured for blind people, the machine is very simple to operate. Records are borrowed free of charge from the Canal Branch of the Public Library. The Readers Service, performed by volunteers, read to patients requesting the service.

Since January the library has remained open at night, Monday through Friday until 9 P. M. During the winter months many residents, interns, externs, and some graduate nurses and dietitians took advantage of the night facilities. Another service the Medical staff can enjoy is to reserve a book or periodical by phone or over the desk. When the material returns, a notice is placed in the past office box.

In December, 1946 an additional member was added to the library staff, enabling it to increase its services to the Medical staff as well as to the patients.

Mrs. Madeline Warren Calhoun filled the position created. Anita Louise Crozat resigned from the library staff in September to enter Library School. In two weeks Marion Wilbert replaced her and resigned in June, 1947 to be replaced by Mrs. Gene Palfrey Ellis.

Through the Volunteer Office the library has profited extensively. Approximately 880 hours have been given to the library through volunteers. Besides some book truck service, typing, and filing, volunteers aid in collecting books and various other details which allow the regular staff more time for other duties. Since late summer and fall colored volunteers from Xavier University and Branches of the Public Library have been assisting in book truck service to colored wards, thus enabling all patients, white and colored, to derive recreational informational, inspirational, and therapeutic benefit from the library facilities—books or magazines—as they are rolled to each in-patient twice a week.

Several large donations of books, many pocket editions, and hundreds of popular magazines have been donated to the library by interested individuals. Pocket editions are not entered in the collection, but are enjoyed immensely by the patients. A list of donors is kept in the library, and donations of books are listed beneath the donor's name.

The Medical and Patients Library is acquiring new friends and patrons daily. Commendation from members of the medical staff, nurses, priests and ministers, and the general public is most heartening. The patients are most appreciative of the service, and from their response, it is felt that a definite therapeutic need is being filled and the basic aid of the Hospital Library is attaining its objective.

ODETTE DOLHONDE, *Librarian.*

July 22, 1947.

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, La.

Dear Dr. Daly:

The Purchasing Department is still faced with difficulty of obtaining materials for the Hospital which are still scarce, although the situation at present is not quite as bad as the previous year—fresh meat, flour and other food commodities are more plentiful; paper, glass, steel and brass items are very hard to obtain; prices are advancing on most commodities. With the steady increase in prices, this Department was forced to cancel over \$13,000 of Purchase Orders, as you know, since May 1st 1947 through June 28th 1947. We were compelled to do this in order to remain within the Hospital appropriation.

The Warehouse has been operating more satisfactorily even under the present conditions with the inadequate floor space to properly store supplies.

We wish to take this opportunity to thank the Director of this Hospital and all Department Heads for the fine co-operation they have given us throughout this past fiscal year.

We are,

Yours very truly,

HERBERT A. RICKS, *Purchasing Agent.*

June 30, 1947.

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, Louisiana

Dear Dr. Daly:

In December, 1944, thirty-two months ago, I was employed by the Louisiana Tuberculosis Association on an experimental basis to work with both Tuberculosis Units, beginning with Dibert, the object being to arrest fear in new patients by giving them complete orientation on entering Dibert of our procedure, amount of time taken for consultation, etc., all general information of concern to patient, ironing out difficulties or training them into channels where they would be; writing letters for those too ill or illiterate, flowers to 24 wards one day weekly; attending to small personal problems such as shopping, phone calls, etc. Also recreation planning was and is a big item and finding means of financing all such projects.

Patients are supplied with all late magazines (the Library does not service it because of loss due to discharges and moving). An aid to morale is sought daily and is kept high as possible with frequent night club and radio (live) shows which are obtained through my close friend John Lester, of Radio and News Columnist. Patients derive much pleasure from these parties which are given and financed by outside clubs or the Trudeau Memorial Guild. Periodically I orientate graduate nurses on Dibert and Breax who are trained for Public Health, giving explanation of procedure, facilities and general information.

Unfortunately, I have not yet been able to devote much time to Breax but currently I have a professional Negro fraternity working with me to furnish a recreation center on the 4th floor. Breax branch of the Guild is also being formed and we will eventually service it in the same manner as Dibert. It will take some time to get auxiliaries functioning as I have in Dibert.

Sincerely,

LAVELLE WALLACE
Recreational Worker at Dibert and Breax
Louisiana Tuberculosis Association

ANNUAL REPORT

CHARITY HOSPITAL VOLUNTEER SERVICE

August 9, 1947

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, La.

Dear Dr. Daly:

During the war, the Hospital was materially aided by a large number of volunteer workers who contributed their services. With the end of the war, a definite decline in their number was noticed. Through a contribution made by the American Women's Voluntary Service, the appointment of a Coordinator of Volunteer Workers was made on July 15, 1946.

It was hoped that under the direction of the Coordinator it would once again be possible to build up a group of volunteers in order to supplement the work being done by paid employees, to stimulate public interest in the Hospital by opening up new fields for volunteers, and to give to these volunteers the supervision and organization which they need to function properly.

A volunteer office was designated in the white clinic waiting room; an advisory committee was appointed; volunteer working standards were established; jobs were listed; and a recruiting campaign was planned. As volunteers came to the Hospital they were assigned according to their skills and interests, and closely supervised on the job.

The following statistics show the results of the new volunteer program:

Total number of hours: 18,101

Total number of volunteers: 320

Total number of hours given to sections:

Admitting Room	326	Physical Therapy	257
Blood Bank	3,387	Reclaim Gauze	1,790
Central Service	2,188	Sewing Room	12
Library	902	Recreational Therapy	120
Nursing Arts	83	Social Service	3,402
Pathology	259	Volunteer Office	128
Pediatrics	1,773	Wards	2,671
Pharmacy	208	Miscellaneous	595

The volunteer organizations active in the Hospital at the present time are:

- Community Volunteer Service
- Red Cross Grey Ladies
- Red Cross Nurses' Aides
- Red Cross Staff Workers
- Red Cross Motor Corps
- Junior League
- Girl Scouts of America
- Council of Jewish Women
- Charity Hospital Guild
- Y. W. C. A. Teen-Age Club
- New Orleans Jr. Women's Club
- American Society for Cancer Control
- Grace Episcopal Society
- Rayne Memorial Church
- St. Charles Presbyterian Church
- Loyola University Students

The projects which have been organized since July 15, 1946 are:

- Junior League Pediatrics Publication
- Girl Scout Reclaim Gauze Program
- Night Reading Group
- Afternoon Reading Group
- Recreational Therapy for Orthopedics

I personally wish to thank you, the Board of Directors, the American Women's Voluntary Service, the volunteers, the Advisory Committee, the Sisters of Charity, and all Hospital Personnel whose cooperation has helped to make this program successful.

Respectfully submitted,

POLLY AMIS
Coordinator of Volunteers
